Larry Cuban

May 2013 Preschool Newsletter:

Confessions of a School Reformer Larry Cuban, 2022-10-18 In *Confessions of a School Reformer* eminent historian of education Larry Cuban reflects on nearly a century of education reforms and his experiences with them as a student educator and administrator Cuban begins his own story in the 1930s when he entered first grade at a Pittsburgh public school the youngest son of Russian immigrants who placed great stock in the promises of education With a keen historian's eye Cuban expands his personal narrative to analyze the overlapping social political and economic movements that have attempted to influence public schooling in the United States since the beginning of the twentieth century He documents how education both has and has not been altered by the efforts of the Progressive Era of the first half of the twentieth century the Civil Rights Movement of the 1950s through the 1970s and the standards based school reform movement of the 1980s through today Cuban points out how these dissimilar movements nevertheless shared a belief that school change could promote student success and also forge a path toward a stronger economy and a more equitable society He relates the triumphs of these school reform efforts as well as more modest successes and unintended outcomes Interwoven with Cuban's evaluations and remembrances are his confessions in which he accounts for the beliefs he held and later rejected as well as mistakes and areas of weakness that he has found in his own ideology Ultimately Cuban remarks with a tempered optimism on what schools can and cannot do in American democracy

Federal Register ,2013-05 **Learning and Literacy over Time** Julian Sefton-Green,Jennifer Rowsell,2014-09-25

Learning and Literacy over Time addresses two gaps in literacy research studies offering longitudinal perspectives on learners and the trajectory of their learning lives inside and outside of school and studies revealing how past experiences with literacy and learning inform future experiences and practices It does so by bringing together researchers who revisited subjects of their initial research conducted over the past 10 20 years with people whom they encountered through ethnographic or classroom based investigations and are the subjects of previous published accounts The case studies drawn from countries in three continents and covering a range of social worlds offer an original and at times quite an emotive interpretation of the effects of long term social change in the UK the US Australia and Canada the claims and aspirations made by and for certain kinds of educational interventions how research subjects reflect on and learn from the processes of being co opted into classroom research as well as how they make sense of school experiences some of the widespread changes in literacy practices as a result of our move into the digital era and above all how academic research can learn from these life stories raising a number of challenges about methodology and our claims to know the people we research In many cases the process of revisiting led to important reconceptualizations of the earlier work and a sense of seeing with new eyes what was missed in the past The reflections on methodology and research processes will interest postgraduate and academic researchers The studies of change and of long term effects are widely relevant to teacher educators and scholars in language and literacy education educational anthropology life history research media and cultural studies and sociology *Deaf Identities* Irene W. Leigh,Catherine A. O'Brien,2020 Much has been written about deaf identities however no single book has focused specifically on how different academic disciplines conceptualize deaf identities in one fell swoop This book *Deaf Identities Exploring New Frontiers* does exactly that It is a unique compilation of multidisciplinary perspectives on the lens of deaf identities written by scholars representing a variety of disciplines including anthropology counseling education literary criticism practical religion philosophy psychology sociology social work and Deaf Studies Nowhere else can one find careful scrutiny of the meaning of deaf identities within for example the disciplines of philosophy and religion Where else can one find a sense of identity in passing as a deaf person instead of almost passing as a hearing person Where else can one examine mutating identities in progressing from Spiderman to the Incredible Hulk The book focuses on how the contributors perceive what deaf identities represent how these identities develop and the societal influences that shape these identities Intersectionality examination of medical educational and family systems linguistic deprivation the role of oppressive

influences what the deaf body is about strategies to facilitate positive deaf identity development and how ethical values are interpreted are among the multiple topics examined in the search to better understand how deaf identities come into being In presenting their deaf identity paradigms contributors have endeavored to intertwine both scholarly and personal perspectives in their efforts to personalize academic content The result is a book that reinforces the multiple ways in which deaf identities are manifested

So They Want Us to Learn French Matthew Hayday, 2015-09-15 Since the 1960s bilingualism has become a defining aspect of Canadian identity And yet today relatively few English Canadians speak or choose to speak French Why has personal bilingualism failed to increase as much as attitudes about bilingualism as a Canadian value In *So They Want Us to Learn French* Matthew Hayday explores the various ways in which bilingualism was promoted to English speaking Canadians from the 1960s to the late 1990s He analyzes the strategies and tactics employed by organizations on both sides of the bilingualism debate Against a dramatic background of constitutional change and controversy economic turmoil demographic shifts and the on again off again possibility of Quebec separatism English speaking Canadians had to decide whether they and their children should learn French Highlighting the personal experiences of proponents and advocates Hayday provides a vivid narrative of a complex controversial and fundamentally Canadian question
