Consults in Obstetric Anesthesiology Suzanne K. W. Mankowitz, 2018-11-15 This text addresses the need for a book specifically aimed at obstetric anesthesia and covers topics such as pulmonary cardiac renal hepatic hematologic neurologic endocrine and other diseases The real anesthetic challenge arises when patients present to Labor and Delivery with unusual or complicated medical problems and in recent years a few of the larger institutions have developed an Obstetric Anesthesiology Consultation Service to prepare for the management of these patients While most pregnant women who present to Labor and Delivery require anesthetic intervention they typically meet the anesthesiologist for the first time in labor Since the majority of laboring women are healthy without significant comorbidities this does not present much of a challenge to the anesthesiologist and the anesthetic management tends to be straight forward with favorable outcomes However using this new model the anesthesiologist has the opportunity to discuss the various treatment modalities and potentially suggest diagnostic testing to be performed prior to delivery similar to the pre operative testing that is done in other surgical environments

Doctors in a Divided Society Mignon Breier, Angelique Wildschut, 2006 Many of the goals of South Africa's new democracy depend on the production of professionals who have not only the knowledge and skills to make our country globally competitive but also a commitment to working and living here Despite numerous reforms the South African health system ten years into democracy remains divided first world private care that ranks with middle income countries internationally at the one end and at the other extreme in the rural public sector in particular conditions that are superior only to the poorest of African countries Much work has been done to change medical school curricula in line with the primary health care focus of government policy and international trends towards problem based learning The student profile in medical schools is now not only more representative of the demographics of South Africa but also reveals a significant increase in female students Whether these students will stay in the country after graduating and serve where they are needed most remains to be seen Publisher's website
