This Element therefore investigates how effectively editing and publishing programmes prepare graduates for industry and how well these graduates translate this instruction to the workplace. Taking a global perspective to gauge the state of the discipline, the mixed methods approach used for this Element comprised two online surveys for educators and graduates, three semi-structured interviews with industry practitioners, scholarly education and trade, and ethnographic practice. Three key concepts also framed this Element's enquiry: learning and doing. The Element demonstrates how these transitioning but interdependent concepts have the potential to form a holistic practice-led pedagogy for students of editing and publishing programmes.
