Financial Management [Revised Edition] John Smeur, 2017-02-28. This book introduces key concepts and methods in business financial management. It consists of two parts. Part one is structured around start-up investments and key financing decisions facing entrepreneurs during their first year in business. The instruments examined include the investment budget, financing plan, the opening balance sheet, financial planning for profits and liquidity, the closing balance sheet, and a complete treatment of ratio analysis. Part two is about cost prices, budgeting, and variance analysis, profit calculation methods, and break-even point, and finally calculations of the returns to alternative investment options. All of these subjects are treated in an accessible stepwise manner and are accompanied with illuminating examples. The combination of theoretical rigor and simple explanations makes the present volume indispensable for both students and entrepreneurs.

Strategic Entrepreneurial Finance Darek Klonowski, 2014-11-27. Entrepreneurial finance is a discipline that studies financial resource mobilization, resource allocation, risk moderation, optimization in financial contracting, value creation, and value monetization within the context of entrepreneurship. However, without proper strategic consideration, the discipline is incomplete. This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision making. The most unique feature of the book is its focus on value creation. For entrepreneurs, value creation is not a one-off activity but rather a continuous cycle of incremental improvements across a wide range of business activities. Entrepreneurial value creation is described in four comprehensive stages: value creation, value measurement, value enhancement, and value realization, referred to as the C-MER model. This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework. At the same time, deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish. Vigorous strategic deliberations maximize the entrepreneurial firm's chances of making the right business decisions for the future, enable the firm to manage its available financial and non-financial resources in the most optimal manner, ensure that the necessary capital is secured to progress the development of the firm to its desired development level, and build value. While financial considerations are important, the field of strategic entrepreneurial finance represents a fusion of three disciplines: strategic management, financial management, and entrepreneurship. This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices.
