Entrepreneurship Edition 4th Barringer:

Social Entrepreneurship Constant Beugré, 2016-11-03 Social entrepreneurship differs from traditional forms of entrepreneurship in that the primary goal of the social venture is to address social problems and needs that are as yet unmet. The driving force of such ventures is social value creation. This new textbook aims to provide a comprehensive cutting edge resource for students introducing them to the unique concerns and challenges that face social ventures through a comparison with the principles of traditional entrepreneurship. The book consists of fourteen chapters covering all aspects of venture creation and management from writing a business plan to financing, people management, marketing and social impact measurement. Social Entrepreneurship uses real life examples and sources to expose students to contemporary developments in the field, encouraging them to think critically about the issues faced by social ventures across the globe. And experiential exercises and assignments are included to provide students with hands on experience in creating and managing their own social ventures. Also containing review and application questions, illustrative cases, definitions of key terms and a comprehensive companion website. Social Entrepreneurship is the essential guide to this rapidly emerging field. Visit the companion website at www.routledge.com/cw/beugre to find For Instructors PowerPoint slides, Multiple choice questions, For Students Extra, illustrative cases, Web links, Links to video. Entrepreneurship in India Deependra Sharma, 2022-10-06 This book introduces readers and students to the entrepreneurial process. It is important as evidence has suggested that the probability of entrepreneurs' success enhances when they thoroughly appreciate the components of the entrepreneurial process as well as how to effectively use them. The fact that nearly 33 percent of new firms fail within the first two years while twenty percent fail within four to five years of their existence makes it evident that while many people are highly motivated to start new firms, motivation alone is not sufficient; rather it should be coupled with relevant information: a strong business idea, a well-crafted business plan and sound execution to maximize chances for success. This work offers an insightful and a practical guide to the process of launching and growing an entrepreneurial organisation with success. It will therefore serve as an important resource to students of Entrepreneurship and to anyone interested in the field academically or practically. Strategic Management Richard Lynch, 2021-04-07 The 9th edition of this comprehensive core textbook builds on its global perspective and approachable written style as it explores the key concepts within a clear and logical structure. Lynch guides you through 19 chapters with updated case studies and pedagogy that support the modern business and management student from start to finish. Continuous contrast between prescriptive and emergent views of strategy highlights key debates within the discipline whilst an emphasis on the practical throughout the book helps you turn theory into practice. Entrepreneurship and Behavioral Strategy T. K. Das, 2020-06-01 Behavioral strategy continues to attract increasing research interest within the broader field of strategic management Research in behavioral strategy has clear scope for development in tandem with such traditional

streams of strategy research that involve economics markets resources and technology The key roles of psychology organizational behavior and behavioral decision making in the theory and practice of strategy have yet to be comprehensively grasped Given that strategic thinking and strategic decision making are importantly concerned with human cognition human decisions and human behavior it makes eminent sense to bring some balance in the strategy field by complementing the extant emphasis on the objective economics based view with substantive attention to the subjective individual oriented perspective This calls for more focused inquiries into the role and nature of the individual strategy actors and their cognitions and behaviors in the strategy research enterprise For the purposes of this book series behavioral strategy would be broadly construed as covering all aspects of the role of the strategy maker in the entire strategy field The scholarship relating to behavioral strategy is widely believed to be dispersed in diverse literatures These existing contributions that relate to behavioral strategy within the overall field of strategy has been known and perhaps valued by most scholars all along but were not adequately appreciated or brought together as a coherent sub field or as a distinct perspective of strategy This book series on Research in Behavioral Strategy will cover the essential progress made thus far in this admittedly fragmented literature and elaborate upon fruitful streams of scholarship More importantly the book series will focus on providing a robust and comprehensive forum for the growing scholarship in behavioral strategy In particular the volumes in the series will cover new views of interdisciplinary theoretical frameworks and models dealing with all behavioral aspects significant practical problems of strategy formulation implementation and evaluation and emerging areas of inquiry The series will also include comprehensive empirical studies of selected segments of business economic industrial government and non profit activities with potential for wider application of behavioral strategy Through the ongoing release of focused topical titles this book series will seek to disseminate theoretical insights and practical management information that will enable interested professionals to gain a rigorous and comprehensive understanding of the subject of behavioral strategy

Entrepreneurship and Behavioral Strategy contains contributions by leading scholars in the field of entrepreneurship with an interest in researching behavioral perspectives The 10 chapters in this volume deal with a number of significant issues relating broadly to the behavioral aspects of entrepreneurship covering topics such as entrepreneurial process orientation a machine learning approach to reviewing the intersection of the entrepreneurship and behavioral strategy literatures the temporalities of entrepreneurial risk behavior entrepreneurs under ambiguity disruptive business model innovations international attention entrepreneurial team formation building alliances in new and small ventures the role of insight in entrepreneurial action and the effects of foreign competition on entrepreneurship activities The chapters include empirical as well as conceptual treatments of the selected topics and collectively present a wide ranging review of the noteworthy research perspectives on the confluence of entrepreneurship and behavioral strategy
