Grammar of spoken Portuguese and the project Towards a History of Brazilian Portuguese PHPB among others Further chapters of high contemporary interest and relevance include the study of linguistic policies and psycholinguistics The manual offers theoretical insights of general interest not least since many chapters present the linguistic data in the light of a combination of formal functional generative and sociolinguistic approaches This rather unique feature of the volume is achieved by the double authorship of some of the relevant chapters thus bringing together and synthesizing different perspectives

Inhaltsangabe Abstract Research on electronic democracy is still limited to a number of institutions researchers and academics Nevertheless interest in the topic grows and new trends and best practices arise The aim of this thesis was to elaborate on the founding principles of eDemocracy to build a model for designing eDemocracy initiatives and to examine the current status quo of eDemocracy projects within the European Commission This thesis is divided into two parts a theoretical part and an empirical part In order to build a solid foundation of the core principles of eDemocracy the thesis links reform mechanisms which were developed under the New Public Management efforts to economical and institutional theories that scientifically support the necessity for new ways of governance It becomes clear that the evolution of eDemocracy is an outcome of diverse political and economical influences and that eDemocracy can substantiate efforts to re invent governmental work processes The first part of this thesis is based on an extensive literature research from various academic disciplines including Economics Institutional Theory Information Technology and Political Studies Sources for the theoretical part come from academic literature academic journals and documents retrieved from the World Wide Web The theories examined and the conclusions drawn upon these theories serve the purpose to gain a deeper understanding for the need to reform the public sector and to improve its outcomes Further those findings allow us to incorporate eDemocracy into the eGovernment and eGovernance efforts which are aimed to digitize governmental work processes The model developed in part one acts as a benchmark for the examination of current public online engagement efforts on a European wide level The European Commission s web site <http://europa.eu.int> is scrutinized in order to examine the current level of design and

operability of the Commission's efforts in engaging the public in decision and policy making For the evaluation of the success of these efforts insights gathered from a personal interview with officials from the Interactive Policy Making team of the European Commission are incorporated Additionally online documents on the European Commission's official web site are examined that substantiate the Commission's intent to promote eDemocracy efforts and to make online engagement tools more accessible and more effective in the Mergent International Manual ,2003 Taxmann's Direct Taxes Manual ,2002
