## **Epistemic Cognition And Development The Psychology Of Justification And Truth:**

**Epistemic Cognition and Development** David Moshman, 2014-12-05 Epistemic cognition the philosophical core of metacognition concerns people's knowledge about the justification and truth of beliefs Multiple literatures in psychology and education address aspects of epistemic cognition In the absence of a coherent conceptual framework however these literatures mostly fail to communicate with each other and often connect only loosely to genuine epistemology This complicates any effort to achieve a systematic theoretical understanding of epistemic cognition and its development Deanna Kuhn writes in her foreword Moshman is not the first to take on this challenge but he fulfills it elegantly and I think the most comprehensively and astutely After reviewing the basics of philosophical epistemology and cognitive psychology *Epistemic Cognition and Development* provides a compelling account of developmental change across childhood and beyond in knowledge about knowledge especially with regard to fundamental conceptions of objectivity subjectivity rationality justification and truth This is followed by detailed consideration of domain specific epistemologies of science logic morality social convention history and identity including associated forms of reasoning The final section provides theoretical conclusions educational and social applications and suggestions for further research *Handbook of Epistemic Cognition* Jeffrey A. Greene, William A. Sandoval, Ivar Bråten, 2016-01-22 The Handbook of Epistemic Cognition brings together leading work from across disciplines to provide a comprehensive overview of an increasingly important topic how people acquire understand justify change and use knowledge in formal and informal contexts Research into inquiry understanding and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert like conceptualizations skills and performance Outside of academic domains issues of who and what to believe and how to integrate multiple sources of information into coherent and useful knowledge have arisen as primary challenges of the 21st century In six sections scholars write within and across fields to focus and advance the role of epistemic cognition in education With special attention to how researchers across disciplines can communicate and collaborate more effectively this book will be an invaluable resource for anyone interested in the future of knowledge and knowing Dr Jeffrey A Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill Dr William A Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education Information Studies Dr Ivar Bråten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo Norway *Handbook of Research on Solutions for Equity and Social Justice in Education* Etim, James, Etim, Alice, 2023-03-02 Education's role should further social justice prepare students to compete for higher social positions train workers and engage students so that they become active participants in a democratic society However as with many global systems education has long ago fallen victim to the institutional ailments of systematic oppression and discrimination In order to promote equity and social justice in education it

is paramount that educators and administrators acknowledge systematic challenges in education and the solutions The Handbook of Research on Solutions for Equity and Social Justice in Education discusses how teachers and school administrators practice equity and inclusion in their schools It provides examples of social justice and how it affects society as well as specific case studies that aim at engendering equity and inclusion for minorities It further discusses these issues in a global context Covering topics such as agentic empowerment social justice in dialogue and teacher social justice advocacy this major reference work is a critical resource for faculty and administrators of both K 12 and higher education preservice teachers teacher educators school social workers and counselors librarians government officials researchers and academicians

*Dissolving the Gettier Problem* John Ian K. Boongaling, 2020-11-18 This book argues that a complete dissolution of the Gettier problem is possible using Jaakko Hintikka s Socratic Epistemology with its emphasis on questioning as a knowledge seeking procedure The key to accomplishing this task is to treat Gettier s counterexamples as a game of inquiry where epistemic agents deal with various pieces of information employ different moves and make different choices or strategies such as bracketing or unbracketing an item of information in determining for themselves what to believe in or what they can claim to have knowledge of This book will appeal to both undergraduate and graduate students as well as post graduate researchers as it offers a novel perspective for understanding the Gettier problem and a cogent explanation for the failures of previously proposed solutions to it All this is made possible by going beyond analysis and dealing with the experiences of epistemic agents in actual problem solving scenarios

**Model-Based Reasoning in Science and Technology** Lorenzo Magnani, Claudia Casadio, 2016-07-01 This book discusses how scientific and other types of cognition make use of models abduction and explanatory reasoning in order to produce important or creative changes in theories and concepts It includes revised contributions presented during the international conference on Model Based Reasoning MBR 015 held on June 25 27 in Sestri Levante Italy The book is divided into three main parts the first of which focuses on models reasoning and representation It highlights key theoretical concepts from an applied perspective addressing issues concerning information

visualization experimental methods and design The second part goes a step further examining abduction problem solving and reasoning The respective contributions analyze different types of reasoning discussing various concepts of inference and creativity and their relationship with experimental data In turn the third part reports on a number of historical epistemological and technological issues By analyzing possible contradictions in modern research and describing representative case studies in experimental research this part aims at fostering new discussions and stimulating new ideas All in all the book provides researchers and graduate students in the field of applied philosophy epistemology cognitive science and artificial intelligence alike with an authoritative snapshot of current theories and applications of model based reasoning
