

Economic Essay

The study of economics is based upon needs and wants of an individual and three factors determine how an economy functions; consuming, producing and the sale of goods and services. The source states that the government is unable to heal the wounds of the economic body. The method to solving any economic issue is in the hands of the producers and consumers. Adam Smith – the father of capitalism whom sits on the right side of the spectrum would support the idea that the producer and consumer control the stability of the economy. However, John Maynard Keynes, an opponent of Adam Smith whom is placed on the left side of the spectrum would not embrace the ideas that the source suggests. He would argue that government intervention is necessary for an economy to recover from a depression. Individuals should embrace this source and ideas of capitalism to a degree because it is possible for government intervention to resolve issues and allow the economy a chance for a full recovery.

An ideology that does not involve government intervention and is based on laissez-faire is known as Capitalism. It was created by Adam Smith – the father of Capitalism as a result of this ideology, a metaphor known as the Invisible Hand Theory was developed. He felt that in a society, producers and consumers as individuals should control the economy in which the Invisible Hand Theory states that an individual will pursue their own self-interest, in doing so it will indirectly benefit the community. A common example of this would be a shoemaker would make shoes for a baker (who was good at making bread, but not at shoes). This would be much more productive for an economy opposed to each individual making his/her own bread and shoes. If consumers didn't want shoes, they would demand fewer shoes, and the shoemaker

The Upside of Inequality Edward Conard, 2016-09-13 The scourge of America's economy isn't the success of the 1 percent quite the opposite. The real problem is the government's well meaning but misguided attempt to reduce the payoffs for success. Four years ago Edward Conard wrote a controversial bestseller *Unintended Consequences* which set the record straight on the financial crisis of 2008 and explained why U.S. growth was accelerating relative to other high wage economies. He warned that loose monetary policy would produce neither growth nor inflation that expansionary fiscal policy would have no lasting benefit on growth in the aftermath of the crisis and that ill advised attempts to rein in banking based on misplaced blame would slow an already weak recovery. Unfortunately he was right. Now he's back with another provocative argument that our current obsession with income inequality is misguided and will only slow growth further. Using fact based logic Conard tracks the implications of an economy now constrained by both its capacity for risk taking and by a shortage of properly trained talent rather than by labor or capital as was the case historically. He uses this fresh perspective to challenge the conclusions of liberal economists like Larry Summers and Joseph Stiglitz and the myths of crony capitalism more broadly. Instead he argues that the growing wealth of most successful Americans is not to blame for the stagnating incomes of the middle and working classes. If anything the success of the 1 percent has put upward pressure on employment and wages. Conard argues that high payoffs for success motivate talent to get the training and take the risks that gradually loosen the constraints to growth. Well meaning attempts to decrease inequality through redistribution dull these incentives gradually hurting not just the 1 percent but everyone else as well. Conard outlines a plan for growing middle and working class wages in an economy with a near infinite supply of labor that is shifting from capital intensive manufacturing to knowledge intensive innovation driven fields. He urges us to stop blaming the success of the 1 percent for slow wage growth and embrace the upside of inequality: faster growth and greater prosperity for everyone.

World on the Move Paolo Mauro, Tomas Hellebrandt, 2016-12-20 The world is poised on the threshold of economic changes that will reduce the income gap between the rich and poor on a global scale while reshaping patterns of consumption. Rapid economic growth in emerging market economies is projected to enable consumers worldwide to spend proportionately less on food and more on transportation goods and services which will in turn strain the global infrastructure and accelerate climate change. The largest gains will be made in poorer parts of the world chiefly sub-Saharan Africa and India followed by China and the advanced economies. In this new study Tomas Hellebrandt and Paolo Mauro detail how this important moment in world history will unfold and serve as a warning to policymakers to prepare for the profound effects on the world economy and the planet.
