The Keynesian Revolution and Our Empty Economy Victor V. Claar, Greg Forster, 2019-04-06 This book considers the cultural legacy of the Keynesian Revolution in economics It assesses the impact of Keynes and Keynesian thinking upon economics and policy as well as the response of the Chicago and Austrian schools and the legacy of all three in shaping economic life The book is a call to restore economics to its roots in moral and cultural knowledge reminding us that human beings are more than consumers The Keynesian Revolution taught us that we should be happy if we are prosperous but instead we feel hollow and morally anxious our economy feels empty Drawing on paradigms from earlier historical periods while affirming modern market systems this book encourages a return to a view of human beings as persons with the right and responsibility to discover and do the things in life that are intrinsically good and enduring Because in the long run the legacy of our choices will continue long after we are all dead

Environmental Performance Measurement World Economic Forum, 2002-02-28 Environmental decision making has long been plagued by uncertainties and a lack of critical information The data and analyses needed for thoughtful and systematic action to minimize pollution harms and to optimize the use of natural resources are often unavailable or seem too costly to obtain As a result choices are made on the basis of generalized observations and best guesses or worse yet rhetoric or emotion

Environmental Performance Measurement The Global Report 2001 2002 presents a new approach to environmental decision making based on facts and analytic rigor It collects in one place the largest amount of environmental data that has ever been assembled at the nation state scale Presented here is the first serious attempt not only to measure environmental sustainability in one summary indicator but also to rank 122 countries on the basis of this index In addition country profiles provide detailed information about the environmental performance of these countries across 22 critical environmental indicators Written by both academics and practitioners this report is an essential tool for environmental performance decision making in many realms and in all countries across the world
