**African Brain Circulation** ,2007-07-30 In this book discussions on African brain circulation and transnational society provide new insights and point to fertile research and policy agendas Today a globally important dilemma concerns citizens who either depart from their homeland to enhance their life chances in a rich society but possibly contribute to a brain drain for their homeland or stay home and work but possibly contribute to a brain waste since conditions at home will not allow them to contribute commensurately with their capability Increasingly scholars on the subject of global South to West emigrants argue that it is not just a possibility of a brain drain occurring when citizens emigrate or brain waste occurring when they stay home but rather a brain gain when they emigrate strategically and contribute to development in the homeland
