Blood Novels Julia H. Chang, 2022-08-31 In the late nineteenth century Spain's most prominent writers Juan Valera Leopoldo Alas and Benito Pérez Galdós made blood a crucial feature of their fiction *Blood Novels* examines the cultural and literary significance of blood unsettling the dominant assumption of the period that blood no longer played a decisive role in social hierarchies By examining fictional works through the rubric of blood novels Julia H Chang identifies a shared fascination with blood that probes the limits of realism through blood's dual nature of matter and metaphor Situating the literature within broader cultural and theoretical debates *Blood Novels* attends to the aesthetic contours of material blood and in particular how bleeding is inflected by gender caste and race Critically engaging with feminist theory theories of race and whiteness literary criticism and medical literature this innovative study makes a case for treating blood as a critical analytic tool that not only sheds new light on Spanish realism but more broadly challenges our understanding of gendered and racialized embodiment in Spain

Making Sense Ralf Hertel, 2005 Fiction is fascinating All it provides us with is black letters on white pages yet while we read we do not have the impression that we are merely perceiving abstract characters Instead we see the protagonists before

our inner eye and hear their voices Descriptions of sumptuous meals make our mouths water we feel physically repelled by depictions of violence or are aroused by the erotic details of sexual conquests We submerge ourselves in the fictional world that no longer stays on the paper but comes to life in our imagination Reading turns into an out of the body experience or rather an in another body experience for we perceive the portrayed world not only through the protagonist s eyes but also through his ears nose tongue and skin In other words we move through the literary text as if through a virtual reality How does literature achieve this trick How does it turn mere letters into vividly experienced worlds This study argues that techniques of sensuous writing contribute decisively to bringing the text to life in the reader s imagination In detailed interpretations of British novels of the 1980s and 1990s by writers such as John Berger John Banville Salman Rushdie Jeanette Winterson or J M Coetzee it uncovers literary strategies for turning the sensuous experience into words and for conveying it to the reader demonstrating how we make sense in and of literature Both readers interested in the contemporary novel and in the sensuousness of the reading experience will profit from this innovative study that not only analyses the interest of contemporary authors in the senses but also pin points literary entry points for the sensuous force of reading

Kinship Novels of Early Modern Korea Ksenia Chizhova, 2021-01-12 The lineage novel flourished in Korea from the late seventeenth to the early twentieth century These vast works unfold genealogically tracing the lives of several generations New storylines often written by different authors follow the lives of the descendants of the original protagonists offering encyclopedic accounts of domestic life cycles and relationships Elite women transcribed these texts which span tens and even hundreds of volumes in exquisite vernacular calligraphy and transmitted them through generations in their families In *Kinship Novels of Early Modern Korea* Ksenia Chizhova foregrounds lineage novels and the domestic world in which they were read to recast the social transformations of Chos n Korea and the development of early modern Korean literature She demonstrates women s centrality to the creation of elite vernacular Korean practices and argues that domestic focused genres such as lineage novels commemorative texts and family tales shed light on the emergence and perpetuation of patrilineal kinship structures The proliferation of kinship narratives in the Chos n period illuminates the changing affective contours of familial bonds and how the domestic space functioned as a site of their everyday experience Drawing on an archive of women centered elite vernacular texts Chizhova uncovers the structures of feelings and conceptions of selfhood beneath official genealogies and legal statutes revealing that kinship is as much a textual as a social practice Shedding new light on Korean literary history and questions of Korea s modernity this book also offers a broader lens on the global rise of the novel
