The results suggest that training should focus on the development of specific skills and knowledge related to the use of the new technologies, rather than on general knowledge or skills. This is because the results show that the use of the new technologies is highly dependent on specific skills and knowledge, and that these skills and knowledge are not easily transferable from other contexts. Therefore, training programs should be designed to provide specific training in the use of the new technologies, rather than general training in the use of technology.
