## Frontiers Of Commodity Chain Research:

**Frontiers of Commodity Chain Research** Jennifer Bair, 2009 Featuring new contributions by leading globalization scholars this timely volume analyzes the organization geography politics and power dynamics of international trade and production networks understood as global commodity chains

**Frontiers of Commodity Chain Research** Jennifer Bair, 2008-10-30 Extending the frontiers of commodity chain research this distinctive volume includes original work from major figures in sociology history geography and labor studies It underscores the wide and interdisciplinary appeal of chain approaches for analyzing the economic social and political dimensions of international trade and production networks Commodity chain analysis sheds light on the political and ecological implications of economic globalization and on how activists in pursuit of social justice workers rights and environmental protection can use it Following a substantive review of literature in the field the collection goes on to examine theoretical and methodological debates over how to conduct research on global commodity and value chains how power is exercised through these chains and how global economic activities are coordinated across space The result is a rich and unusually coherent volume that demonstrates how commodity and value chain analysis is informing contemporary research in a variety of fields

*Handbook on Global Value Chains* Stefano Ponte, 2019 Global value chains GVCs are a key feature of the global economy in the 21st century They show how international investment and trade create cross border production networks that link countries firms and workers around the globe This Handbook describes how GVCs arise and vary across industries and countries and how they have evolved over time in response to economic and political forces With chapters written by leading interdisciplinary scholars the Handbook unpacks the key concepts of GVC governance and upgrading and explores policy implications for advanced and developing economies alike

*Global Commodity Chains and Labor Relations*, 2021-01-18 Due to the increasing linkage of global production sites the concept of commodity chains has become indispensable for the investigation of production at a global scale Although work is the basis of production in every involved location it is often being neglected as a research subject without taking interest in the workers the work processes and the working conditions This edited volume provides a collection of historical and contemporary commodity chain studies by placing labor at the centre of analysis A global historical perspective demonstrates that splitting production processes to different hierarchically connected locations are by no means new phenomena The book is thus an important and valuable contribution to commodity chain research but also to the fields of social economic and global labour history Contributors are Andr s Pinkasz Andrea Komlosy Christin Bernhold Ernst Langthaler Franziska Ollendorf Goran Musi Jan Grumiller Johanna Sittel J rg Nowak Karin Fischer Klemens Kaps Miroslav Lacko Santosh Hasnu Stefan Schmalz Tam s Ger cs Tibor T Meszmann and Uwe Spiekermann

*Global Value Chains and Development* Gary Gereffi, 2018-09-10 Globalization has transformed how nations firms and workers compete in the international economy over the past half century This book by

Gary Gereffi one of the founders of the global value chains GVC framework traces the emergence of arguably the most influential approach used to analyze globalization and its impacts It studies the conceptual foundations of GVC analysis the twin pillars of governance and upgrading along with detailed case studies of China Mexico and other emerging economies as main beneficiaries of export oriented industrialization and addresses potential solutions to the deleterious impact of globalization on workers and communities

**Kenyan Cut Flower Industry and Global Market Dynamics** Andreas Gemählich,2022 Investigates the production trade

and consumption of the bouquets sold in European supermarkets and the consequences of this for the globalised economy From a macro perspective it appears that the cut flower industry has changed into a buyer driven value chain with corporate retailers as the new lead firms Yet as this book shows this is insufficient to explain how new trade relations come into being and the consequences of this not only for global economics but for the producers climate change and rural livelihoods As the retailers and wholesalers of the flower industry in the West linked directly to producers in the Global South trade relations changed fundamentally and this critical new book explores the complexities of the power asymmetries and the way in which corporate retailers have shaped the market to promote their own interests as well as the role non economic actors played This book examines in detail the situation at Lake Naivasha Kenya which has played a central part within this new market order Since the 1970s the area has developed into one of the most important production areas for the ready made bouquets that sell so cheaply in European supermarkets For the flower growers themselves however coping with the new conditions of supply and demand the new market order has brought financial precariousness Farms needed to be flexible in the production and marketing of their flowers Yet while they were able to expand their production and achieve more stable employment conditions this has not resulted in significantly higher remuneration The rapidly changing economic situation has also had a profound impact not only on local stakeholders but on the environment where there is intensified competition for resources and new production technologies Published in association with the Collaborative Research Centre FUTURE RURAL AFRICA funded by the German Research Council DFG
