J. Burgovne, 2001 Fibre reinforced plastics are increasingly being used as replacements for steel reinforcement in concrete structures The reinforcement can be untensioned or it can be in the form of prestressing tendons It is also suitable for gluing onto the outside of a structure to improve flexural or shear performance This book provides up to date research results to give engineers confidence in their design methods Advances in FRP Composites in Civil Engineering Lieping Ye, Peng Feng, Qingrui Yue, 2012-02-01 Advances in FRP Composites in Civil Engineering contains the papers presented at the 5th International Conference on Fiber Reinforced Polymer FRP Composites in Civil Engineering in 2010 which is an official conference of the International Institute for FRP in Construction IIFC The book includes 7 keynote papers which are presented by top professors and engineers in the world and 203 papers covering a wide spectrum of topics These important papers not only demonstrate the recent advances in the application of FRP composites in civil engineering but also point to future research endeavors in this exciting area Researchers and professionals in the field of civil engineering will find this book is exceedingly valuable Prof Lieping Ye and Dr Peng Feng both work at the Department of Civil Engineering Tsinghua University China Qingrui Yue is a Professor at China Metallurgical Group Corporation Fiber-reinforced Polymer (FRP) Concrete Solutions 2011 Michael Grantham, Viktor **Reinforcement for Concrete Structures** ,2005 Mechtcherine, Ulrich Schneck, 2011-09-08 The Concrete Solutions series of International Conferences on Concrete Repair began in 2003 with a conference held in St Malo France in association with INSA Rennes followed by the second conference in 2006 with INSA again at St Malo France and the third conference in 2009 in Padova and Venice in association with the University of Padova Now in 2011 the event is being held in Dresden in Germany and has brought together some 112 papers from 33 countries Whereas electrochemical repair tended to dominate the papers in earlier years new developments in structural strengthening with composites have been an increasingly important topic with a quarter of the papers now

focusing on this area New techniques involving Near Surface Mounted NSM carbon fibre rods strain hardening composites and new techniques involving the well established carbon fibre and polyimide wrapping and strengthening systems are presented Seventeen papers concentrate on case studies which are all important in such conferences to learn about what works and what doesn t work on real structures Thirteen papers are devoted to new developments in Non Destructive Testing NDT Other topics include service life modelling fire damage surface protection methods and coatings patch repair general repair techniques and whole life costing This book is essential reading for anyone engaged in the concrete repair field from engineers to academics and students and also to clients who as the end user are ultimately responsible for funding these projects and making those difficult decisions about which system or method to use **Proceedings of the Indian** Structural Steel Conference 2020 (Vol. 2) Mahendrakumar Madhavan, James S. Davidson, N. Elumalai Shanmugam, 2023-08-22 This book comprises the select peer reviewed proceedings of the Indian Structural Steel Conference ISSC 2020 The topics cover state of the art and state of the practice in structural engineering and latest research in structural modeling and design Novel analytical computational and experimental techniques proposal of new structural systems innovative methods for maintenance rehabilitation and monitoring of existing structures and investigation of the properties of engineering materials as related to structural behavior are presented in the book This book will be very useful for structural engineers researchers and consultants interested in sustainable materials and steel construction Solutions 2014 Michael Grantham, P.
