

## BOSCH COMMON RAIL DIESEL INJECTION

Written with the kind permission & support of  
BOSCH AUSTRALIA PTY. LTD.

### Basic Design Features of CRD

There is a chamber which is similar in appearance to a Petrol Engine EFI Fuel Rail mounted along the top of the Engine (i.e. the Fuel Rail or otherwise known as the "Common Rail"). The Rail is filled with fuel via a High Pressure Pump being driven directly by the engine. The design principle & operation is near identical to that of a Petrol Engine with EFI.

**NOTE:** Fuel Pressure is *NOT* created via Engine Oil Pressure as it is in some other types of CRD engines. This system is known as Hydraulic Electric Unit Injection – **HEUI**.

The Fuel is maintained under this extremely high pressure in the rail as so desired by the ECM. Steel tubes connected to each injector supply this pressurised fuel from the rail. The injectors therefore can be operated by the ECM at any time to produce the very fine spray pattern (thanks to the readily available - at all times - high fuel pressure) in order to promote clean combustion.

**NEVER "CRACK OPEN" AN INJECTOR LINE WITH THE ENGINE RUNNING OR CRANKING.**

Fuel pressure can reach a **MAXIMUM PRESSURE** of 1600 BAR (23,000PSI).
