fundamental concepts for each chapter provide additional direction for instructors and students alike *Humanity's Last Stand* Nicanor Perlas, 2018 The twenty first century is the age of science and technology It will also be the age when humanity confronts for the first time a challenge that may overwhelm and destroy the human species itself in as little as 12 to 20 years from now This is the challenge of artificial intelligence AI Deployed properly AI will confer tremendous benefits to society It is already doing this Deployed inappropriately or mistakenly AI will undermine human civilization as it is also starting to do and could then lead to the extinction of humanity Scientists philosophers and engineers call this latter possibility the existential risk of AI The fate of our future is literally in our hands Nicanor Perlas from the preface Although still in its earliest stages artificial intelligence is radically transforming all aspects of society With the immanent emergence of Artificial Super Intelligence ASI and the illusory temptations of transhumanism humankind stands at a crossroads Nicanor Perlas makes an urgent plea in this book It is imperative he says that we take immediate steps to ensure that digitized technology is aligned to human values and priorities Otherwise ASI will kill the essence of our humanity Furthermore if we do not master it now ASI will transform humanity into its own image ultimately it will destroy the human race AI experts have not offered a single cogent solution to this existential threat Rudolf Steiner however not only foresaw these developments but also provided clear alternatives Steiner who developed a contemporary scientific approach to spirituality provided philosophical ontological and social innovations to save humanity from this technological abyss It is the task of the global anthroposophic movement to pioneer this civilization saving work to establish spiritual scientific ideas in mainstream culture that would allow AI to emerge in a healthier societal context Perlas offers an overview of the AI phenomenon together with its related transhuman concepts of perfecting humanity outlining the critical internal and external responses needed to meet them consciously In particular the author addresses the movement connected to the work of Rudolf Steiner indicating its all important tasks to cooperate with progressive individuals and movements including scientists and civil society activists to mobilize its daughter movements for action and ultimately to cooperate with the spiritual powers that have guided and served humanity since the dawn of time This says Perlas is humanity's last stand Failure is not an option *Life-Cycle and Sustainability of Civil Infrastructure Systems* Alfred Strauss, Dan Frangopol, Konrad Bergmeister, 2012-09-18 Life Cycle and Sustainability of Civil Infrastructure Systems contains the lectures and papers presented at the Third International Symposium on Life Cycle Civil Engineering IALCCE 2012 held in one of Vienna's most famous venues the Hofburg Palace October 3rd 6th 2012 This volume consists of a book of extended abstracts 516 pp and a DVD ROM **City of Rivals** Jason Grumet, 2014-09-09 Forty years ago the Watergate scandal deeply wounded Americans' faith in government Since then good government reformers and big government opponents have been on a shared mission to make everything transparent The problem is that too much light is scaring Congressmen away from making the tough choices necessary to govern in the national interest It's no secret that the backrooms are where things get done and where politicians can collaborate without

reprise In City of Rivals Grumet boldly argues that the answer lies in harnessing partisanship not spinning in its mud America is once again gripped by fear that we are falling behind and fast Unlike the Soviet threat that shook our nation a half century ago the menace today is homegrown On issues of national importance the two parties in Congress appear incapable of working together Whether the threat is competition from China crumbling infrastructure or rising debt Washington's legitimacy to govern and capacity to solve problems are in doubt The Bipartisan Policy Center's president Jason Grumet tackles this issue head on by challenging the conventional diagnosis of the current gridlock Rather than lamenting our differences Grumet offers practical steps to govern a polarized nation and he explores the unintended consequences of past reform movements It is a must read for all who care about our country's future
