**Education in a Federal UK** John Furlong, Ingrid Lunt, 2019-10-23 Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK. It seems that for the first time the public, the media and the political elite have woken up to the fact that in different parts of the UK there are different histories, different aspirations and different imagined futures in relation to a whole range of vitally important political issues. But what the public debate often fails to recognise is that in many areas of public life, perhaps especially education, the UK is already a federal state and in key respects has been so for many years. The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK. This has been achieved by commissioning two different papers from each of the four countries: Wales, Scotland, Northern Ireland and England. The first is an overview exploring the distinctive history, principles and current policies of each country. The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country: the Foundation Phase for Wales, assessment policy in Scotland, shared education initiatives in Northern Ireland and higher education policy in England. Taken together, these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today. This volume was originally published as a special issue of *Oxford Review of Education*.

**Success in Higher Education** Leigh N. Wood, Yvonne A. Breyer, 2016-10-26 This book explores successful transition strategies to within and from university for students from around the globe. With Macquarie University, a large Australian university, studied in depth, it addresses the meaning of success taking a variety of perspectives including student, staff and employer views. The chapters present a series of initiatives that have proven to be successful in assisting students in developing their academic potential throughout university and beyond. The authors of the chapters use a variety of methodologies and approaches reflecting the diverse local contexts and requirements. These international perspectives demonstrate a triumph of practice that has led to the empowerment of individuals and groups. The approaches from twelve universities located in eight different countries stem directly from the coalface and provide many valuable lessons and tools that colleagues in the sector will be able to consider and adapt in their own contexts. Small interventions matter: from a mentor of a nervous student who goes on to achieve greatness to the use of a curriculum design model that hooks a whole group of students into learning and achievement. This book covers both the small individual victories and the larger scale strategies that support success. Contributions emanate from Australia, Bangladesh, India, China, New Zealand, United Kingdom, Canada, USA, Uruguay and South Africa.

**The Use of Screencasting in Higher Education** Jetmir Abdija, Tunku Badariah, Tunku Ahmad, Mohamad Sahari Nordin, 2018-09-15 Screencasting is a powerful instructional tool for learning, yet few in higher education take advantage of its utility. This book showcases the benefits of screencasting and how it can facilitate students' acquisition of complex content like statistics. It is a condensed version of a case study that examined the effects of screencasts on postgraduate students.

learning of advanced statistics Every chapter guides the reader through the intricate process of conducting the research and gives a complete picture of the design materials and instrumentation If you are a novice researcher and are interested in technology this book is for you      **Higher Mathematics for Students of Chemistry and Physics** Joseph William Mellor,1905
