Swallowed By Time Darrell G. Coley,2024-09-22 Captain Arnold Beeken is a man guiding his Liberty ship the John A Johnson across several hundred miles of open ocean near the Hawaiian Islands when he and his crew

suddenly find themselves under attack by a Japanese submarine As the ship begins to sink and the lifeboats are blown to bits it appears all souls onboard are doomed Moments later a vessel appears deep underwater near their coordinates The engineering crew inside it was on a quest to develop a new stealth technology which has resulted in an unintended voyage through time As Lee Michaels the de facto captain of the vessel guides his crew to the surface he and his team suddenly witness the horror playing out as sharks circle the victims Unfortunately they cannot intervene with history to change the outcome Still Michaels decides to rescue the survivors and bring them aboard As he leads his team of heroic time travelers struggling to stay faithful to their Christian values he wonders why God has chosen him for such a task Will he and his team manage to travel through time without transforming the course of history In this inspirational science fiction novel a group of engineers on an unintended voyage through time must navigate through well known historical events without changing the outcome

Inadvertent Escalation Barry R. Posen, 2013-04-15 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted
