Winning Francesco Duina, 2013-08-25 Why winning doesn't always lead to happiness Most of us are taught from a young age to be winners and avoid being losers But what does it mean to win or lose And why do we care so much Does winning make us happy Winning undertakes an unprecedented investigation of winning and losing in American society what we are really after as we struggle to win our collective beliefs about winners and losers and much more Francesco Duina argues that victory and loss are not endpoints or final destinations but gateways to something of immense importance to us the affirmation of our place in the world But Duina also shows that competition is unlikely to provide us with the answers we need Winning and losing are artificial and logically flawed concepts that put us at odds with the world around us and ultimately ourselves Duina explores the social and psychological effects of the language of competition in American culture Primarily concerned with our shared obsessions about winning and losing Winning proposes a new mind set for how we can pursue our dreams and in a more satisfying way find our proper place in the world

Catastrophic Incentives Jeff Schlegelmilch, Ellen Carlin, 2023-10-03 Silver Award Winner 2024 Nonfiction Book Awards

Societies are vulnerable to any number of potential disasters: earthquakes, hurricanes, infectious diseases, terrorist attacks, and many others. Even though the dangers are often clear, there is a persistent pattern of inadequate preparation and a failure to learn from experience. Before disasters, institutions pay insufficient attention to risk; in the aftermath, even when the lack of preparation led to a flawed response, the focus shifts to patching holes instead of addressing the underlying problems. Examining twenty years of disasters from 9/11 to COVID-19, Jeff Schlegelmilch and Ellen Carlin show how flawed incentive structures make the world more vulnerable when catastrophe strikes. They explore how governments, the private sector, nonprofits, and academia behave before, during, and after crises, arguing that standard operational and business models have produced dysfunction. *Catastrophic Incentives* reveals troubling patterns about what does and does not matter to the institutions that are responsible for dealing with disasters. The short-termism of electoral politics and corporate decision-making, the funding structure of nonprofits, and the institutional dynamics shaping academic research have all contributed to a failure to build resilience. Offering a comprehensive and incisive look at disaster governance, *Catastrophic Incentives* provides timely recommendations for reimagining systems and institutions so that they are better equipped to manage twenty-first century threats.

The Patient Will See You Now Eric Topol, 2016-10-25

The essential guide by one of America's leading doctors to how digital technology enables all of us to take charge of our health. A trip to the doctor is almost a guarantee of misery. You'll make an appointment months in advance. You'll probably wait for several hours until you hear the doctor will see you now, but only for fifteen minutes. Then you'll wait even longer for lab tests, the results of which you'll likely never see unless they indicate further and more invasive tests, most of which will probably prove unnecessary, much like physicals themselves. And your bill will be astronomical. In *The Patient Will See You Now*, Eric Topol, one of the nation's top physicians, shows why medicine does not have to be that way. Instead, you could use your smartphone to get rapid test results from one drop of blood, monitor your vital signs both day and night, and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor, all at a small fraction of the cost imposed by our modern healthcare system. The change is powered by what Topol calls medicine's Gutenberg moment. Much as the printing press took learning out of the hands of a priestly class, the mobile internet is doing the same for medicine, giving us unprecedented control over our healthcare. With smartphones in hand, we are no longer beholden to an impersonal and

paternalistic system in which doctor knows best Medicine has been digitized Topol argues now it will be democratized Computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable Massive open online medicine where diagnostics are done by Facebook like comparisons of medical profiles will enable real time real world research on massive populations There s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy Nevertheless the result better cheaper and more human health care will be worth it Provocative and engrossing *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care That is for all of us **Aging** ,1990 *The Natural Way to Beat the Common Cold and Flu* Richard Trubo,1998 It s not always easy to separate facts from folklore when it comes to fighting colds and flu Is it true that ginger can help Is exercise a good idea or a bad idea Is it starve a cold and feed a fever or the other way around Health writer Richard Trubo explores the current developments in both traditional and alternative medicine to help you decide what the right treatment is for you for a healing approach that s natural safe and effective
