Psychometrics and Psychological

Assessment Carina Coulacoglou, Donald H. Saklofske, 2017-06-19 Psychometrics and Psychological Assessment Principles and Applications reports on contemporary perspectives and models on psychological assessment and their corresponding measures. It highlights topics relevant to clinical and neuropsychological domains including cognitive abilities, adaptive behavior, temperament, and psychopathology. Moreover, the book examines a series of standard as well as novel methods and instruments along with their psychometric properties, recent meta-analytic studies, and their cross-cultural applications. Discusses psychometric issues and empirical studies that speak to same. Explores the family context in relation to children's behavioral outcomes. Features major personality measures as well as their cross-cultural variations. Identifies the importance of coping and resilience in assessing personality and psychopathology. Examines precursors of aggression and violence for prediction and prevention.

Psychological Assessment in South Africa Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. Psychological Assessment in South Africa provides in-depth coverage of a range of areas within the broad field of psychological assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals, including psychologists, psychometrists, remedial teachers, and human resource practitioners.

Contemporary Intellectual Assessment, Third Edition Dawn P. Flanagan, Patti L. Harrison, 2012-01-24 In one volume, this authoritative reference presents a current, comprehensive overview of intellectual and cognitive assessment with a focus on practical applications. Leaders in the field describe major theories of intelligence and provide the knowledge needed to use the latest measures of cognitive abilities with individuals of all ages, from toddlers to adults. Evidence-based approaches to test interpretation and their relevance for intervention are described. The book addresses critical issues in assessing particular populations, including culturally and linguistically diverse students, gifted students, and those with learning difficulties and disabilities in today's educational settings. New to This Edition: Incorporates major research advances and legislative and policy changes. Covers recent test revisions plus additional tests: the NEPSY II and the Wechsler Nonverbal Scale of Ability. Expanded coverage of specific populations: chapters on autism spectrum disorders, attention deficit hyperactivity disorder, sensory and physical disabilities, and traumatic brain injury and intellectual disabilities. Chapters on neuropsychological approaches, assessment of executive functions, and multi-tiered service delivery models in schools.
