The Benzodiazepines Crisis John Peppin, Joseph V. Pergolizzi, Robert B. Raffa, Steven L. Wright, 2021 Misused abused diverted and counterfeited benzodiazepines have serious potential for substance use disorder and are among the leading causes of drug related overdose deaths. Evidence indicates that prolonged use of benzodiazepines causes a wide range of adverse reactions and withdrawal can be particularly challenging. Nevertheless these negative aspects have yet to be thoroughly addressed within the medical community and remain virtually unknown to patients. This book offers an in depth discussion of the downsides of this overused class of drugs and calls for their rational and dramatically reduced usage.
