

MOUNTING YOUR SOLAR PANELS

Solar panels should be mounted on a secure structure, ground mount or top of pole mount. Several ideas can be found at RPSolarpumps.com/mounting

Panels should face true South and at an angle appropriate for your latitude. If you are mounting your panels on an already built structure, try to get as close to the correct angle as possible.

Ensure there are no shadows or other obstructions on the solar panels. While shadowing a small corner of a single panel may not seem like a big deal, since the panels are connected in series, a small shadow can limit the power output from all other panels connected in series! This means a small shadow on a single panel could reduce system power by hundreds of watts. Time to get out that chainsaw and trim some trees!
