Matter Of Life And Death:

Matter of Life and Death Charles Hoffacker, 2003-04-25 With the sensitivity born of time and experience Charles Hoffacker presents an unusually warm and caring approach to preaching at a pivotal transition in human life one which goes to the very heart of the Good News of Jesus Christ Hoffacker teaches the reader whether a seasoned preacher or a novice homilist to find the key to unlocking the mystery of Jesus promise of eternal life in a mortal life now ended **Matter of Life and Death** Barbara Rogers, 2018-04-12 Barbara Rogers argues that population growth would not be a problem if all women had access to safe and effective contraception If half the world's women have one less child our numbers would stabilise The women's movement and environmentalists should take this up as a priority allowing poor women the same access to reproductive choice as richer ones take for granted Modern eugenics developed by Nazi racial theorists is now rife among fundamentalists racists and nationalists It aims to suppress women's ability to choose when to get pregnant crudely aimed at forcing us to breed About 40% of pregnancies worldwide are unintended and about half of these are ended by abortion most of which are dangerous The best way to reduce abortions is through good contraception The book examines the strange origins of the Catholic Church's ban on choice It has failed to convince most of its own members and has resorted to pressurising governments and infiltrating the United Nations and international conferences The United States under Donald Trump has slashed funding for reproductive health and imposed a global gag This can and must be challenged internationally Family planning organisations must also rethink their strategy and focus on women's need to decide for themselves for themselves how many children to have and when All international bodies and national governments have a crucial role to play this book explains how [A Matter of Life and Death](#) Simon R. Cancer has become the scourge of the twentieth century It was always part of the human condition but until recently it was not a common cause of death because most people died from the infectious diseases Now that so many of us will live long enough to develop cancer we need to learn as much about it as we can This requires some understanding of molecular biology John Cairns has made significant contributions to cancer research molecular biology and virology He believes that it is possible to explain what is known about cancer and about molecular biology in terms that are easily understood by people with little or no scientific training In this fascinating book he explores the revolution in public health the origins and principles of molecular biology and our emerging understanding of the causes of cancer Finally he discusses how these developments are likely to affect future generations As Cairns points out the last two hundred years have altered our life expectations beyond all recognition Even in the less developed nations of the world people are starting to believe that everyone ought to be able to live into old age and be protected from the major causes of premature death This change in our expectations is one of the major benefits of technology and the biological sciences But the resulting explosion in the human population ultimately threatens everything we have gained by scientific progress Matters of Life and Death Jonathan Lee,2023-07-04
