Proceedings of the International Conference Theory and Applications in the Knowledge Economy TAKE 2017

Blazenka Knezevic, Gaby Neumann, 2017-07-08 Foreword A famous Portuguese Poet once said around one hundred years ago before I was born all the words that should save the Humanity had already been written the only thing that was missing was to save Humanity Fast forward to the 21st century services led and knowledge based economy and we have myriads of theoretical study about the decisive assets namely intangibles Those analysis are made in several perspectives namely Human Resources Knowledge Management Intellectual Capital and also many sectorial perspectives like Trade Economics Logistics Social Policy etc However today the question about the applicability of all these studies remains unsolved So it like many of the words that will save the Knowledge Economy have already been written all we need is to save the Knowledge Economy Or is it not The idea behind TAKE Conference was to provide a multidisciplinary forum in which those multiple perspectives will come together We believe it is a fruitful operation and we intend to continue the exercise in the future The problem of the relation between theory and practice in the knowledge economy is getting more important and not less important with the development of the BRICS and other nations TAKE main question will be one of the problems of the 21st century Following the promising start of TAKE 2016 in Aveiro Portugal TAKE 2017 was organized by the Faculty of Economics of Zagreb University around Prof Blazenka Knezevic I would like to thank her and her team for the massive effort in putting TAKE 2017 together It will be a very nice and memorable conference I would like also to thank the 5 keynotes the special sessions and workshop organizes the authors of the 60 papers and 5 posters the stream leaders the reviewers and the sponsors for the efforts And to the 90 participants from 20 countries Austria Bosnia Herzegovina Canada Croatia Germany Hong Kong Hungary Netherlands Mexico Portugal Poland Romania Russia South Africa Serbia Slovakia Spain Thailand United Kingdom United States A special word to Prof Gaby Neumann from Wildau who organized the Proceedings Let us make TAKE 2017 a great occasion and help save the knowledge economy a bit Eduardo Tom Conference Chair Zagreb July 2017

Role of Lipids in Virus Assembly Jamil S. Saad, Delphine M. Muriaux, 2015-07-28 RNA enveloped viruses comprise several families belonging to plus and minus strand RNA viruses such as retroviruses flavoviruses and orthomyxoviruses Viruses utilize cellular lipids during critical steps of replication like entry assembly and egress Growing evidence indicate important roles for lipids and lipid nanodomains in virus assembly This special topic covers key aspects of virus membrane interactions during assembly and egress especially those of retroviruses and Ebola virus EBOV Virus assembly and release involve specific and nonspecific interactions between viral proteins and membrane compartments Retroviral Gag proteins assemble predominantly on the PM Despite the great progress in identifying the factors that modulate retroviral Gag assembly on the PM there are still gaps in our understanding of precise mechanisms of Gag membrane interactions Studies over the last two decades have focused on the mechanisms by which other retroviral Gag proteins interact with membranes

during assembly These include human immunodeficiency virus HIV Rous sarcoma virus RSV equine infectious anemia virus EIAV Mason Pfizer monkey virus M PMV murine leukemia virus MLV and human T lymphotropic virus type HTLV 1 Additionally assembly of filoviruses such as EBOV also occurs on the inner leaflet of the PM The articles published under this special topic highlight the latest understanding of the role of membrane lipids during virus assembly egress and release

Active Learning in College Science Joel J. Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these

distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of na ve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for

Bhandari,2022-09-01 Getting the Climate Science Facts Right discusses climate change science with reference to the Intergovernmental Panel on Climate Change IPCC Addressing climate change is the most important public priority of the 21st Century Unlike many issues however this issue is being driven by both science and its interface with politics The main institution for bridging this division between science and international politics is the IPCC As such it is the main source of the

facts from which climate change policy is developed This book describes the ways in which the IPCC arrives at these facts and so can be sure they are complete and evidence based Seldom in history has science had such a direct relationship with politics The negotiation of an international policy regime requires at its outset an agreement on the facts In this case the facts are scientific complex and contentious Governments have recognized this and have by using the IPCC set up institutional machinery to provide facts from a source and in a manner that they can accept The way in which the IPCC functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level Starting with a process to examine review and debate scientific findings leading to a consensus about scientific fact usually expressed as probabilities that the findings will hold over time the IPCC then concludes by using the kind of consensus development mechanism that the United Nations typically uses to achieve agreements leading to the formation of policy regimes The book examines the structure of the IPCC its composition and its procedures in order to achieve an understanding of its role and future

Lipids in Cyanobacteria, Algae, and Plants - From Biology to Biotechnology Eric Marechal,Koichiro Awai,Juliette Jouhet,Mie Shimojima,2022-02-17 **Measuring difference, numbering normal** Coreen McGuire,2020-08-11 This electronic version has been made available under a Creative Commons BY open access license This book is available as an open access ebook under a CC BY licence Measurements and their manipulation have been underestimated as crucial historical forces motivating and guiding the way we think about disability Using measurement technology as a lens and examining in particular the measurement of hearing and breathing this book draws together several existing discussions on disability phenomenology healthcare medical practice big data embodiment and emerging medical and scientific technologies around the turn of the twentieth century These are popular topics of scholarly attention but have not until now been considered as interconnected topics within a single book As such this work connects several important and usually separate academic subject areas and historical specialisms The standards embedded in instrumentation created strict but ultimately arbitrary thresholds of what is categorised as normal and abnormal Considering these standards from a long historical perspective reveals how these dividing lines shifted when pushed **Decision-Based Learning** Nancy Wentworth,Kenneth J. Plummer,Richard H. Swan,2021-09-16 In this book you will read stories told by faculty who have redesigned their university courses using the Decision Based Learning pedagogy and the impact this powerful strategy can have on student learning It should be of use to anyone teaching and designing curricula in higher education settings *Cancer Systems Biology* Ravi Salgia,Mohit Kumar Jolly,Prakash Kulkarni,Govindan Rangarajanm,2025-09-04 Over the centuries civilization has seen considerable advances in healthcare Cancer is among the most challenging healthcare issues that we face today but a number of discoveries have led to better care Despite all the progress and the promise regarding early detection and precision medicine we are still faced with the nettlesome problem cancer is a moving target Even within an individual tumour deep sequencing analyses now indicate multiple phenotypically

distinct subpopulations whose representation seems to vary dramatically from one stage to the next as the tumour progresses Cancer Systems Biology provides state of the art reviews and thought provoking ideas in a concise and succinct manner This insightful textbook is a crosspollination of concepts from multiple disciplines and experimental approaches to study cancer The chapters provide new ideas and thoughts outlining how a quantitative picture of cancer can provide a deeper understanding of the disease and how a systems level perspective may hold the key to fully comprehend how cancer arises and progresses Written by experts in multiple disciplines including systems biologists science researchers physicists mathematicians and clinicians Cancer Systems Biology provides a comprehensive up to date treatise devoted to understanding cancer from a systems perspective Providing new conceptual insights that can aid precision medicine it will be essential reading for academic researchers in the field clinicians graduate students and scientists with an interest in cancer biology
