**Secret Diplomacy** Corneliu Bjola, Stuart Murray, 2016-04-14 This volume investigates secret diplomacy with the aim of understanding its role in shaping foreign policy Recent events including covert intelligence gathering operations accusations of spying and the leaking of sensitive government documents have demonstrated that secrecy endures as a crucial yet overlooked aspect of international diplomacy The book brings together different research programmes and views on secret diplomacy and integrates them into a coherent analytical framework thereby filling an important gap in the literature The aim is to stimulate generate and direct the further development of theoretical understandings of secret diplomacy by highlighting gaps in existing bodies of knowledge To this end the volume is structured around three distinct themes concepts contexts and cases The first section elaborates on the different meanings and manifestations of the concept the second part examines basic contexts that underpin the practice of secret diplomacy while the third section presents a series of empirical cases of particular relevance for contemporary diplomatic practice While the fundamental conditions diplomacy seeks to overcome alienation estrangement and separation are imbued with distrust and secrecy this volume highlights that if anything secret diplomacy is a vital if misunderstood and unfairly criticised aspect of diplomacy This book will be of much interest to students of diplomacy intelligence studies foreign policy and IR in general *Push Back* Judith Large, 2016-12-15 In 2009 after decades of conflict the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam Subsequently the state proved resistant to attempts by the UN and other international bodies to promote post war reconciliation or reform In this incisive new work Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts as well as exploring the wider context of rising Sinhalese nationalism the attendant growth of discrimination against minorities and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace *Push Back* is vital reading not only for those interested in Sri Lanka but also for those concerned about the wider implications of the conflict for human rights peace making and geopolitics *Statutes and Ordinances of the University of Cambridge 2015* University of Cambridge, 2015-10-08 The official Statutes and Ordinances of the University of Cambridge *From Is to Ought: The Place of Normative Models in the Study of Human Thought* Shira Elqayam, David E. Over, 2016-08-12 In the study of human thinking two main research questions can be asked Descriptive Q What is human thinking like Normative Q What ought human thinking be like For decades these two questions have dominated the field and the relationship between them generated many a controversy Empirical normativist approaches regard the answers to these questions as positively correlated in essence human thinking is what it ought to be although what counts as the ought standard is moot In contemporary theories of reasoning and decision making this is often associated with a Panglossian framework an adaptationist approach which regards human thinking as a priori rational In contrast prescriptive normativism sees the answers to these two questions as negatively correlated Normative models are still relevant to human thought but

human behaviour deviates from them quite markedly with the invited conclusion that humans are often irrational Prescriptive normativism often results in a Meliorist agenda which sees rationality as amenable to education Both empirical and prescriptive normativism can be contrasted with a descriptivist framework for psychology of human thinking Following Hume's strict divide between the is and the ought descriptivism regards the descriptive and normative research questions as uncorrelated or dissociated with only the former question suitable for psychological study of human behaviour This basic division carries over to the relation between normative ought rationality based on conforming to normative standards and instrumental is rationality based on achieving one's goals Descriptivist approaches regard the two as dissociated whereas normativist approaches tend to see them as closely linked with normative arguments defining and justifying instrumental rationality This research topic brings together diverse contributions to the continuing debate Featuring contributions from leading researchers in the field the e book covers a wide range of subjects arranged by six sections The standard picture Normativist perspectives In defence of soft normativism Exploring normative models Descriptivist perspectives Evolutionary and ecological accounts Empirical reports With a total of some 24 articles from 55 authors this comprehensive treatment includes theoretical analyses meta theoretical critiques commentaries and a range of empirical reports The contents of the Research Topic should appeal to psychologists linguists philosophers and cognitive scientists with research interests in a wide range of domains from language through reasoning judgment and decision making and moral judgment to epistemology and theory of mind philosophical logic and meta ethics

**Neuromanagement and Neuromarketing** Vincenzo Russo, Qingguo Ma, Jesper Clement, Jia Jin, Tao Liu, Margherita Zito, 2022-10-18 Corporate behaviour and sustainable development Haiyue Liu, Xiaoyu Wang, Yuli Shan, Shiyang Hu, Rui Xue, 2023-05-09 *Challenging the Internationalisation of Education* Lucy Bailey, 2023-07-07. This book presents a searing critique of the global take on education, questioning why the idea that education should be international has come to dominate the field and positing that the discourse of internationalisation has altered the way we conceptualise education. Using diverse examples from the Middle East, the UK and South East Asia, the book gathers insights from international schooling, refugee education and the internationalisation of higher education to argue that the global gaze renders other ways of looking at education as invisible. It suggests that an oversaturation of international comparison amongst individuals and institutions alike creates a culture of powerlessness, exclusion and silencing. Furthermore, this volume also debates the issues that are caused when education is required to transcend national boundaries. Ultimately, questioning the global education system in its current form, this book will be an important contribution for academics, researchers and students in the fields of higher education, education policy and politics, and education and development more broadly.
