Mazda Rx8 Price:

The Consumer Response to Gasoline Price Changes Kenneth Thomas Gillingham, 2011 When gasoline prices rise people notice the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden Yet raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency improving policies we could implement in the transportation sector This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices both on the intensive margin i e how much to drive and the extensive margin i e what vehicles to buy I assemble a unique and extremely rich vehicle level dataset that includes all new vehicle registrations in California 2001 to 2009 and all of the mandatory smog check program odometer readings for 2002 to 2009 The full dataset exceeds 49 million observations Using this dataset I quantify the responsiveness to gasoline price changes on both margins as well as the heterogeneity in the responsiveness I develop a novel structural model of vehicle choice and subsequent utilization where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference at both the time of purchase and the time of driving This utility consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies including gasoline taxes and feebates I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions with more responsiveness than in many recent studies in the literature I estimate a medium run i e roughly two year elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard I estimate a medium run elasticity of driving with respect to the price of gasoline around 0.15 for new personal vehicles in the first six years Older vehicles are driven much less but tend to be more responsive with an elasticity of roughly 0.3 I find that the vehicle level responsiveness in driving to gasoline price changes varies by vehicle class income geographic and demographic groups I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero implying a greater responsiveness than the true responsiveness This is an important methodological point for much of the literature estimating similar elasticities ignores these two issues These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions but is a relatively non distortionary policy instrument to raise revenue When the externalities of driving are considered an increased gasoline tax may not only be relatively non distortionary but even economic efficiency improving However I find that the welfare changes from an increased gasoline tax vary significantly across counties in California an important consideration for the political feasibility of the policy Finally I find suggestive evidence that the rebound effect of a

policy that works only on the extensive margin such as a feebate or CAFE standards may be closer to zero than the elasticity of driving with respect to the price of gasoline This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin **Autocar** ,2005 **The Car Book 2006** Jack Gillis,Amy Curran,David Iberkleid,2003 *Lemon-Aid New Cars and Trucks 2013* Phil Edmonston,2012-12-01 Offers advice for prospective buyers of cars and trucks reveals information on secret warranties and confidential service bulletins and tells how to complain and get results *Lemon-Aid New Cars and Trucks 2012* Phil Edmonston,2011-01-01 Phil Edmonston Canada s automotive Dr Phil pulls no punches He says there s never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices more cash rebates low financing rates bargain leases and free auto maintenance programs In this all new guide he says Audis are beautiful to behold but hell to own biodegradable transmissions rodent snack wiring and mind boggling depreciationMany 2011 12 automobiles have chin to chest head restraints blinding dash reflections and dash gauges that can t be seen in sunlight not to mention painful wind tunnel roar if the rear windows are opened while underwayEthanol and hybrid fuel saving claims have more in common with Harry Potter than the Society of Automotive EngineersGM s 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade agoYou can save 2 000 by cutting freight fees and administrative chargesDiesel annual urea fill up scams cancost you 300 including an 80 handling charge for 25 worth of ureaLemon Aid s 2011 12 Endangered Species List the Chinese Volvo the Indian Jaguar and Land Rover the Mercedes Benz Smart Car Mitsubishi and Suzuki *The Car Book 2007* Jack Gillis,Amy Curran,David Iberkleid,2007 **Business 2.0** ,2004 *Maximum PC* ,2006-01 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave *Confessions of a Mediocre Widow* Catherine Tidd,2014-01-07 I spent my 11th wedding anniversary planning my husband s funeral If I could just figure out how to make that rhyme it would be the beginning of a great country song Involuntarily single That s the true story of where Catherine Tidd finds herself just three weeks after turning thirty one Widowed with three children under six years old a rusty resume no fix it skills and no clue how to live life as a widow Catherine can t help but be a little exasperated with her dead husband for leaving her to deal with life on her own Catherine s now in charge of her life in a way she never wanted to be in a way that would have most of us reeling and numb But she soon realizes that when you call the shots you can make pedicures one of the stages of grief and that moving forward might be more fun in a new sports car Her honest *Confessions of a Mediocre Widow* is a glimpse into the heartbreaking and sometimes humorous world of a young woman who learns that it is possible to find joy in an unexpected life *Popular Science* ,2001-03 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and
