fields of the farmer or along it has run the railroad The farm has become a town site and then a manufacturing city the trading post at St Paul and the village by the Falls of St Anthony have expanded into the Twin Cities of the Northwest the marshy prairie by the side of Lake Michigan where the Indians fought around old Fort Dearborn has come to be one of the world's mighty centers of urban population and all this transformation within the memory of men now living The progress of this rapid titanic evolution of an empire was greatly accelerated by the desires the strength and the energy of multitudes of immigrants from Europe and in at least six great commonwealths of the Northwest the Swedes Norwegians and Danes have been among the chief contributors to State building During the eighty years ending in June 1906 among the 24 000 000 immigrants who came to the United States the Scandinavians numbered more than 1 700 000 Whether viewed as emigrations on the eastern shores of the Atlantic or as immigrations on the western shores these modern Völkerwanderungen constitute one of the wonders of the social world in comparison with which most of the other migrations in history are numerically insignificant The Israelites marching out of Egypt were but a mass of released bond men the invasions of the Goths Vandals and Huns were conquering expeditions full of boisterous thoughtless unforecasting energy Even the immigration from Europe to America in the whole of the seventeenth century scarcely equalled in number the columns which moved westward in any one year from 1880 to 1890 In this flux of humanity mobile almost to fluidity various in promise of utility shifting in proportions of the good and bad of pauper refugee and fanatic or bird of passage sweatshop man and home builder there has been such an interplay of subtle and vast forces that no just and final appreciation can as yet be reached But some sort of tentative conclusions may be arrived at by intensive study of each immigrant group following it through years and generations searching for its ramifications in the body politic and social The student of this phase of American history must attempt the scientific method and exercise the patience of the student of physical nature No geologist for example would think for a moment of generalizing as to the history and the future of a continent of complicated structure after a few examinations here and there of cross sections of its strata He must know from thoroughgoing observation the trend thickness and composition of each stratum he must trace if possible the sources of the material which he finds metamorphosed he must be familiar with the physical and the chemical forces at work in and on this material heat pressure movement affinities gases water wind and sun In like manner the student of immigration as a whole or of a section as large as that of the Scandinavians or Italians must make careful discriminations as to previous conditions and influences and also must notice carefully the differentiation of peoples places and times
