Repositories for Print Pentti Vattulainen,Steve O'Connor,2018-03-05 Repositories for low use books have long existed for the larger cultural institutions across the globe Libraries have long been strong developers of off site storage This need has evolved for libraries because of their continuous collection of print materials as a record of the intellectual and cultural output of different cultures Libraries have had this role described neatly and executed as a clear professional role This new book will primarily examine two aspects of this role Firstly the organisational and technological responses to this evolving role will be explored and secondly the wide breadth of strategic responses to challenges of digital will be detailed In this authors to this edited volume will describe their work for libraries but increasingly for Galleries Archives and Museums The papers are drawn from Europe United Kingdom the United States and Australasia The organisational models discussed in the book provide clear illustration of imaginative responses to the plight of the individual institutional library New organisational

models are shaping the way in which business can be done in times of change The pressures today on all cultural institutions are similar and so there is a new convergence of similar need and similar solutions This book is an acknowledgment that there are a wide variety of strategic organisational and technological responses to the retention of cultural objects whether they be books art records or other cultural objects It is illustrative of the power of good lateral thinking and planning by professionals of the power of international networks and of convergence in response to need The book will be an edited with a future perspective by Pentti Vattulainen and Steve O Connor who have had significant experience in this area internationally
