Designing Usable and Secure Software with IRIS and CAIRIS Shamal Faily,2018-04-28 Everyone expects the products and services they use to be secure but building security in at the earliest stages of a system's design also means designing for use as well Software that is unusable to end users and unwieldy to developers and administrators may be insecure as errors and violations may expose exploitable vulnerabilities This book shows how practitioners and researchers can build both security and usability into the design of systems It introduces the IRIS framework and the open source CAIRIS platform that can guide the specification of secure and usable software It also illustrates how IRIS and CAIRIS can complement techniques from User Experience Security Engineering and Innovation Entrepreneurship in ways that allow security to be addressed at different stages of the software lifecycle without disruption Real world examples are provided of the techniques and processes illustrated in this book making this text a resource for practitioners researchers educators and students

**Project Success and Quality** Andrew Wright,Therese Lawlor-Wright,2018-09-03 Projects are inherently risky since they involve some level of uncertainty doing something new in the target environment but the percentage of projects seen as a success is still disappointingly low especially for IT projects The Iron Triangle of time cost quality suggests that all three aspects are equal but with quantitative methods for monitoring project performance the focus is primarily on managing cost and time This book seeks to redress the balance explaining the rationale and benefits of focusing more on quality fitness for purpose and conformance to requirements before detailing a range of tools and techniques to support rebalancing the management of projects programmes and portfolios It shows how managing project quality actively can reduce costs through minimising wastage and reduce delays through avoiding rework leading to improved project success rates and customer satisfaction
