Emotion in Motion Mike Robinson, David Picard, 2016-05-06 What happens when tourists scream with fear shout with anger and frustration weep with joy and delight or even faint in the face of revealed beauty How can certain sites affect some tourists so deeply that they require hospitalisation and psychiatric treatment What are the inner contours of tourist experience and how does it relate to specific emotional cultures What are the consequences of the emotional cultures of tourists upon destinations How are differences in emotional culture mobilized and played out in the transnational contact zones of international tourism While many books have engaged with the structural frames of tourist practice and experience this is the first to deal with the emotional dimensions of tourism travel and contact and the ways in which they can transform tourists destinations and travel cultures through emotional engagements The book brings together an international array of scholars from anthropology psychiatry history cultural geography and critical tourism studies to explore how the movement to and through the realms of exotic people wild nature's subliminal art spirit worlds metropolitan cities and sexualised others variably provoke emotions peak experiences travel syndromes and inner dialogues The authors show how tourism challenges us to engage with concepts of self other time nature sex the body and death Through a set of ethnographic and historic cases they demonstrate that such engagements usually have little to do with the actual destination but rather are deeply anchored in personal memories repressed fears and desires and the collective imaginaries of our societies **Design, User**

Mind in Motion Barbara Tversky, 2019-05-21 An eminent psychologist offers a major new theory of human cognition movement not language is the foundation of thought When we try to think about how we think we can't help but think of words Indeed some have called language the stuff of thought But pictures are remembered far better than words and describing faces scenes and events defies words Anytime you take a shortcut or play chess or basketball or rearrange your furniture in your mind you've done something remarkable abstract thinking without words In Mind in Motion psychologist Barbara Tversky shows that spatial cognition isn't just a peripheral aspect of thought but its very foundation enabling us to draw meaning from our bodies and their actions in the world Our actions in real space get turned into mental actions on thought often spouting spontaneously from our bodies as gestures Spatial thinking underlies creating and using maps assembling furniture devising football strategies designing airports understanding the flow of

people traffic water and ideas Spatial thinking even underlies the structure and meaning of language why we say we push ideas forward or tear them apart why we're feeling up or have grown far apart Like Thinking Fast and Slow before it Mind in Motion gives us a new way to think about how and where thinking takes place Motion Picture Herald, 1926 **Forces in Motion** Graham Lock, 2018-07-18 Based on interviews from a 1985 tour this book profiles one of jazz's most important figures Anthony Braxton discusses the expression of his musical visions and related ethical political and spiritual beliefs Absolutely essential reading The Wire Training in Motion Mike Kuczala, 2015-06-10 This book explains how movement enhances learning and introduces a unique and highly effective way to energize a team and increase retention through simple body focused techniques Whether your employees are stuck behind a desk or having to sit through another meeting chances are they are being kept from moving around most of the workday This is resulting in restless bodies wavering attention spans and based on the latest neuroscience research decreased learning and productivity Managers desiring to maximize their employees productivity and reach new levels of success for the company would be wise to not ignore the innate human desire for motion In Training in Motion learn how to Tie lessons to movement in order to reinforce concepts Manage learners physical and emotional states to increase engagement and bolster memory Use posture physical gestures and other movements to command interest Employ quick physical breaks to efficiently refocus your team Turn lackluster meetings into high achieving learning environments Complete with practical easy to apply activities Training in Motion will help you add an almost universally untapped component to your training and managing methods that will provide your office environment the winning edge you've been searching for Designing Objects in Motion Kensho Miyoshi, 2020-11-23 The movement of designed objects is not just something purely functional but also triggers a wide range of sensations A curtain swaying gently in the wind can cause the onlooker to feel easy and relaxed as if it was he or she who is floating in the air This imagined projection caused by the perception of moving objects is called kinesthetic empathy In this study which followed on from a dissertation at the School of Design Research in London the author investigates the esthetics of movement by documenting his own design based learning and research process in terms of research through design using the experimental cooperation with puppet players as an example He thereby creates a framework that allows designers to observe the esthetics of objects in motion as a trigger of feelings Spiritual Power in Motion Ned Byron Pendergast, Lynne P. Ferdon, 2018-01-24 How often do we truly find the time to reflect and dwell on our thoughts And even when we do take a moment to read or absorb ourselves in thought how often do we deeply meditate on our thinking or even revisit our understandings In Spiritual Power in Motion authors Ned Byron Pendergast and Lynne Pendergast Ferdon invite you to join them in writing down your own thoughts and ideas in this touching heartfelt and faithful collection of inspirational essays poems and reflections Sharing their own quiet moments and meditations on such themes as emotion healing the majesty of creation the character of our loving God and more Ned and Lynne express in words the life giving power of the Holy Spirit in

offering us daily revelations God and his Holy Spirit are with us throughout this lifetime and by taking time to listen for the Lord in prayer we can hear see and feel this abiding presence each and every step on the way But in order to hear Gods voice or words we must also tell him of our need be willing to listen and have faith that our prayers are heard **Body and Mind in Motion** Glenna Batson, Margaret Wilson, 2014-06-01 Western contemporary dance and body mind education have engaged in a pas de deux for more than four decades The rich interchange of somatics and dance has altered both fields but scholarship that substantiates these ideas through the findings of twentieth century scientific advances has been missing This book fills that gap and brings to light contemporary discoveries of neuroscience and somatic education as they relate to dance Drawing from the burgeoning field of embodiment itself an idea at the intersection of the sciences humanities arts and technologies *Body and Mind in Motion* highlights the relevance of somatic education within dance education dance science and body mind studies *Centric Poetry & Storytelling in Motion* Tabitha Fefee, 2013-08-28 The book is designed to make you laugh cry and related to touching moments in my life and in the lives of others I hope you enjoy the book as much as I enjoyed writing it Love Songs in Motion Christina J. Woolner, 2023-11-24 An intimate account of everyday life in Somaliland explored through an ever evolving musical genre of love songs At first listen both music and talk about love are conspicuously absent from Somaliland s public soundscapes The lingering effects of war the contested place of music in Islam and gendered norms of emotional expression limit opportunities for making music and sharing personal feelings But while Christina J Woolner was researching peacebuilding in Somaliland s capital Hargeysa she kept hearing snippets of songs Almost all of these she learned were about love In these songs poets musicians and singers collaborate to give voice to personal love aspirations and often painful experiences of love suffering Once in circulation the intimate and heartfelt voices of love songs provide rare and deeply therapeutic opportunities for dareen wadaag feeling sharing In a region of political instability these songs also work to powerfully unite listeners on the basis of shared vulnerability transcending social and political divisions and opening space for a different kind of politics Taking us from 1950s recordings preserved on dusty cassettes to new releases on YouTube and live performances at Somaliland s first postwar music venue where the author herself eventually takes the stage Woolner offers an account of love songs in motion that reveals the capacity of music to connect people and feelings across time and space creating new possibilities for relating to oneself and others Songs in Motion Yonatan Malin, 2010-05-26 Qualities of motion and emotion in song come from poetic images melody harmony and voice leading but they also come from rhythm and meter the flow and articulation of words and music in time This book explores rhythm and meter in the nineteenth century German Lied including songs for voice and piano by Fanny Hensel n e Mendelssohn Franz Schubert Robert Schumann Johannes Brahms and Hugo Wolf The Lied as a genre is characterized especially by the fusion of poetry and music Poetic meter itself has expressive qualities and rhythmic variations contribute further to the modes of signification These features often carry over into songs even as they are set in the more strictly

determined periodicities of musical meter A new method of declamatory schema analysis is presented to illustrate common possibilities for setting trimeter tetrameter and pentameter lines Degrees of rhythmic regularity and irregularity are also considered There has been a wealth of new work on metric theory and analysis in the past thirty years here this research is reviewed and applied in song analysis Topics include the nature of metric entrainment drawing on music psychology metric dissonance hypermeter and phrase rhythm Whereas narrative accounts of the nineteenth century Lied typically begin with Schubert here forms of expansion and elision in songs by Hensel provide a point of departure Repetition links up directly with motion in songs by Schubert including his famous Gretchen am Spinnrade The doubling and reverberation of vocal melody creates a form of interiorized resonance in Schumann s songs Brahms and Wolf are typically understood as polar opposites in the later nineteenth century here the differences are clarified along with deeper affinities Songs by both Brahms and Wolf may be understood as musical performances of poetic readings and in this regard they both belong to a late period of cultural history
