The Coach's Guide to Mind Mapping Misia Gervis, Temisan Williams, 2017-08-10 The Coach's Guide to Mind Mapping is a tool that will help you become an expert coach. Although this particular learning resource uses soccer examples, it is a technique that can be universally applied within any sporting context. Because the current demands of modern day coaching require coaches to know and deliver a greater deal of knowledge to players, the mind mapping technique aims to support the coaching process by helping you to identify and develop your ability to recall technical and tactical knowledge from memory. Additionally, the resource can be used to help facilitate the knowledge acquisition process as you journey through your coaching qualifications while developing key learning skills. This book focuses on developing how you, the coach, can remember, organize, and deliver the technical and tactical information that your players need. It contains guidelines for developing, creating, and evaluating the impact of the mind mapping technique. Familiar soccer themes are used to help you follow the mind mapping examples with ease. Interactive exercises help you to practice the mind mapping technique, reflect on your development, and set personal targets. So go ahead, learn, coach, develop. **Coach Education in Football** Thomas Leeder, 2022-06-09 Association Football is undoubtedly a global sport with millions of individuals participating in more than 200 countries. Each chapter, organised via a central theme, highlights a contemporary issue affecting football coach education and development within a specific country, offering insights into the contextual opportunities and challenges. The book covers essential topics including the progression of female football coaches, coaches' perspectives towards current provision, technological and pedagogical advances, and the historical development of formal coach education. Each chapter demonstrates the complexities associated with developing football coaches within grassroots and high performance domains while providing recommendations for national governing bodies, policy makers, and coach developers.
