

Winding the Bobbin

1. To wind the bobbin, the balance wheel must be disconnected from the stitching mechanism. Hold the balance wheel with your left hand and turn the stop motion knob (Fig. 22) toward you with your right hand. This will permit the balance wheel to turn freely while the needle bar remains motionless. The balance wheel is now disconnected for the bobbin winding operation.
2. Place a spool of thread on the spool pin. Draw thread from the spool over arm guide down ward across machine from left to right. (Fig. 21)
3. Pass the thread through the tension disc of the bobbin winder thread guide located at the right corner of the machine bed.
4. Now wind the end of the thread around an empty bobbin seven or eight times and place the threaded bobbin on the spindle of the bobbin winder.
5. By pressing on the bobbin winder lever, the small rubber wheel is brought in contact with the balance wheel. To lock into position, press bobbin winder lever until a click is heard. The bobbin winder stop later is now touching the shaft of the bobbin. It holds the bobbin in place.
6. Now manipulate your foot control or knee control in the same manner as in sewing and when the bobbin is completely full it will release automatically and stop turning. Detach bobbin from spindle. Hold balance wheel firmly with left hand and with the right hand turn stop motion knob away from you until it can not be moved any further and the needle bar moves with the turning of the balance wheel.
