## Electoral College

The president is elected by a majority of electoral votes. After an election a group of electors chosen by each state officially cast the electoral votes for their state to choose the President.

## Articles of Confederation

This document was adopted by the Second Continental Congress in 1781 during the Revolutionary War to create a national government. The new government was weak because states held most of the power, and Congress lacked the power to tax, regulate trade, or control the coining of money. It was later replaced with the U.S. Constitution.

## Great Compromise

introduced by Roger Sherman; set up a bicameral Congress - upper house called Senate with each state getting 2 votes & a lower house called the House of Representatives with each state's representation based on its population--satisfied both the large and small states

## 3/5 Compromise

compromise made when writing the Constitution to satisfy both free and slave states; said for every 5 slaves, 3 would count in a state's population for both representation and tax purposes

## Federalism

the breaking of the gov't into Federal and state levels, each having certain powers

## Checks and Balances

system of each branch of gov't having a power to check the power of the other to make sure no one branch becomes too powerful

## Executive Branch

headed by the President and carries out the laws; also includes the Vice President and the Cabinet members

Speaking to the need to move beyond traditional formulations this textbook presents radical visions for transforming civic education in the United States Drawing on the experience of educators and scholars including those rooted in feminist queer abolitionist global and race conscious perspectives this work offers new practical ideas for civic education reform Responding to recent political crises many scholars educators and public commentators have called for a rebirth of civic education but these all are grounded in the premise that the goal of civic education should be to teach students about the U S Constitutional system and how to operate within it This book argues that the U S governmental system including the Constitution is infused with racist and anti democratic premises and procedures It asks How can we seek a new path one that is more democratic more equitable and more humane A diverse range of leading civic educators who are willing not just to push the boundaries of civic education but to operate outside its assumptions altogether explore what future possibilities for civic education might look like and how these innovative ideas could be implemented in the classroom Combining theory with practice The Future of Civic Education will be important reading for those studying or researching in social studies methods social studies issues citizenship and civic education It will also be beneficial to social studies teachers at elementary and secondary levels as well as policymakers and non governmental organizations NGOs      American Monthly Review of Reviews Albert Shaw,1929      *Announcements* Florida State University.
