Cultural Matters William T. Pink, George W. Noblit, 2005 In this book the authors explore the position that systemic reform requires addressing the culture of individual schools and that various reform efforts address school culture in different ways The chapters advocate that the key to success is the match between the strategy in use and the setting In the chapters reforms and their interactions with particular school cultures are explored through fieldwork The reader can learn from the cases what it takes to mount and sustain a systemic reform initiative at the school level The book is intended for teachers principals parents and others as a window into how to think about reform in schools even as they must comply with the demands of accountability policy Jacket Grading Education Richard Rothstein, 2008-12-14 Yes we should hold public schools accountable for effectively spending the vast funds with which they have been entrusted But accountability policies like No Child Left Behind based exclusively on math and reading test scores have narrowed the curriculum misidentified both failing and successful schools and established irresponsible expectations for what schools can accomplish Instead of just grading progress in one or two narrow subjects we should hold schools accountable for the broad outcomes we expect from public education basic knowledge and skills critical thinking an appreciation of the arts physical and emotional health and preparation for skilled employment and then develop the means to measure and ensure schools success in achieving them Grading Education describes a new kind of accountability plan for public education one that relies on higher quality testing focuses on professional evaluation and builds on capacities we already possess This important resource Describes the design of an alternative accountability system that would not corrupt education as does NCLB and its state testing systems Explains the original design of NAEP in the 1960s and shows why it should be revived Defines the broad goals of education beyond math and reading test scores and reports on surveys to confirm public and governmental support for such goals Relates these broad goals of education to the desire for accountability in education *Counting: How We Use Numbers to Decide What Matters* Deborah Stone, 2020-10-06 Required reading for anyone who s interested in the truth Robert Reich In a post Trumpian world where COVID rates soar and Americans wage near civil war about election results Deborah Stone s Counting promises to transform how we think about numbers Contrary to what you learned in kindergarten counting is more art than arithmetic In fact numbers are just as much creatures of the human imagination as poetry and painting the simplest tally

starts with judgments about what counts In a nation whose Constitution originally counted a slave as three fifths of a person and where algorithms disproportionately consign Black Americans to prison it is now more important than ever to understand how numbers can be both weapons of the powerful and tools of resistance With her signature brilliance Robert Kuttner eminent political scientist Deborah Stone delivers a mild altering work Jacob Hacker that shows how being in thrall to numbers is misguided and dangerous New York Times Book Review
