## Tools of Geography

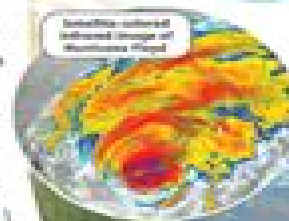

is overlaid on a grid, which can be digital, analog, or even only mental. The height of the grid is arbitrary. Some authors go as far as to propose a standard, or a constant, for the grid height. In general, the height of the grid is called a *cartographic*.

Geography and health help shape culture patterns, including religion, politics, language, and food. **Maps** are visual representations of data that geography can be used around a location. Maps include a compass rose to determine direction, a scale to measure distance, and a title to describe the map.

There are also photographs, images obtained from satellites entering the earth. These images come free of charge to cartographers and allow them to create detailed maps of physical features. The modern tools of geography can make the study of the world more and more
