Dilemmas of Science Teaching John Wallace, William Loudon, 2005-06-29 This book explores sixteen contemporary issues in science education by examining the practical dilemmas these issues provoke for teachers. It is a unique book which presents student teachers with personal and professional insights into a whole range of science topics including the laws of science teaching ethics laboratories and culture gender and ethnicity. Each chapter takes as its focus one of the sixteen issues and begins with a case study of a science lesson written by a practising teacher. This is followed by a short reflective piece by the same teacher on how the lesson went and how opportunities for teaching and learning could be improved. This reflection is followed by commentaries from some of the world's leading science educators on what they felt were the strengths and weaknesses of the lesson. The extensive use of teacher written case studies and commentaries will make this book suitable for the pre-service courses where case methods are typically used to provide a context for learning the craft of teaching. The addition of commentaries from distinguished scholars makes the book relevant for postgraduate courses in science education and as a reference volume for teacher researchers.

**Dilemmas of Science Teaching** John William Wallace, 2002 This text combines theory practice and personal perspectives through the use of case studies and commentaries by senior scholars in the field of science education.

*In It Together* Debbie Zacarian, Michael Silverstone, 2015-02-17 Harness the power of teacher student school family and community partnerships to promote student success. Teaching effectively in diverse classrooms has become more complex than ever. The authors of this practical compelling and inspiring book propose that understanding the spheres of influence that connect students with teachers peers family members and the broader community significantly increases the odds that every student will succeed in school. In clear practitioner friendly language with examples from an inspiring range of K-12 educators the authors explore how tapping into the rich resources of teachers students families the school community and the community at large can make the work of learning more successful for all involved. Richly detailed vignettes and concrete evidence based strategies help you systematically build coalitions of support around learning and engagement.
