What is Economics and Why Does it Matter? Marcin Gorazda, Tomasz Kwarciński, 2025-08-22 Through a series of contemporary cases issues and applications this book provides an engaging initiation to the philosophy of economics The book explores the morality of economics the role of the state policies for well being and the methods applied by economists To encourage the idea of debate the book explores both the pro and contra arguments of key questions Why can t economists predict future crises Why do we pay taxes and who should pay more Should we open borders for economic immigrants Why do we rely on GDP Is economics an experimental science By exploring these questions and many more the book provides an accessible and

thought provoking overview of current debates in philosophy of economics This book is an ideal introduction to contemporary issues and questions in the philosophy of economics for all academic readers Enough of Us Cheryl Levinson, Ellis Levinson, 2013-02 Couples without children continue to be viewed as strange and too often they are only just tolerated But Cheryl and Ellis Levinson a married couple who have lived childfree for twenty eight years don't just defend those who refrain from having children they celebrate them They also argue that society doesn't treat childfree couples fairly and that many couples with children are putting the world at risk Overpopulation poses real dangers including an increased threat of climate change accelerated animal and plant extinctions and the wholesale destruction of rainforests and other habitats The Levinsons explore the increasingly common choice to remain childfree and challenge the ethics of those who choose to procreate They consider a host of issues including liabilities facing children motivations to have children financial implications lack of parental preparation nature versus nurture and world sustainability Despite the dangers of overpopulation many people continue to have children without thinking through the consequences It's time to take a larger view and consider whether or not there are Enough of Us **How We Think, but not in School** Patrick J.

Lewis, 2007-01-01 If story is the basic principle of mind then what are we doing in elementary schools In this provocative exploration of narrative the author writes from the idea that story is integral to the generation of meaning in human experience Indeed story plays a significant role in the formation of identity and the development of greater empathic understanding The text begins with a discussion of the epistemological and ontological nature of narrative in human understanding and then travels across the narrative landscape of the school setting Through an examination of the impact of standards and accountability emphasis on curriculum the author suggests current practice may be undermining student learning and engagement Further the author places oracy in temporary opposition to literacy challenging us to rethink our assumptions about the role of literacy in learning Without negating the importance of literacy attention is drawn to what is lost in chasing the assumed inherent goodness of a text based literacy and how this might hinder the growth of our children The value of narrative in developing teaching practice and promoting significant learning is brought to the foreground of the discussion which naturally journeys into an exploration of curriculum raising serious questions about developmental approaches to curriculum construction How we think but not in school will appeal to elementary teachers early literacy teachers teacher educators and those interested in narrative *The Code Economy* Philip E. Auerswald, 2017-01-25 What do Stone Age axes Toll House cookies and Burning Man have in common They are all examples of code in action What is code Code is the DNA of human civilization as it has evolved from Neolithic simplicity to modern complexity It is the how of progress It is how ideas become things how ingredients become cookies It is how cities are created and how industries develop In a sweeping narrative that takes readers from the invention of the alphabet to the advent of the Blockchain Philip Auerswald argues that the advance of code is the key driver of human history Over the span of centuries each major stage in

the advance of code has brought a shift in the structure of society that has challenged human beings to reinvent not only how we work but who we are We are in another of those stages now The Code Economy explains how the advance of code is once again fundamentally altering the nature of work and the human experience Auerswald provides a timely investigation of value creation in the contemporary economy and an indispensable guide to our economic future **The Wire** Sherryl Vint,2013-03-15 Analyzes how The Wire repurposed television drama for political critique Frequently described by creator David Simon as a novel for television The Wire redefined the police serial format by unfolding its narrative across many episodes constructing themes for each of its seasons and refusing to portray individual crimes outside of their social context While it never achieved spectacular ratings or won an Emmy during its 2002 2008 run on HBO the show was honored with several awards and has been described by critics as the best show on television In this volume author Sherryl Vint takes a close look at several episodes of The Wire to argue that the series challenges our understanding of the relationship between entertainment and social critique Informed by recent work on race poverty and the transformation of the American inner city through neoliberalism Vint provides a compelling analysis of The Wire in four chapters First she examines the season 1 episode The Buys as an example of the ways in which The Wire diverges from the police procedural format She continues by considering season 2's All's Prologue and season 3's Middle Ground to explore in more detail The Wire's critique of the exclusions of the capitalist economy In the final two chapters she looks at Final Grades the fourth season finale to highlight the problems with institutional inertia and show both the need for and barriers to reform and uses the season 5 episode Clarifications to consider the failure of the media to adequately reflect the social issues depicted in The Wire One of the landmark series of recent television history The Wire is ripe for research and discussion Fans of the series and those interested in social commentary and the media will appreciate Vint's new analysis in this volume Math Education for America? Mark Wolfmeyer,2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest **Everything's an Argument** Andrea A. Lunsford,John J. Ruszkiewicz,Keith

Walters,2012-10-05 This best selling brief text shows students how to analyze all kinds of argument not just essays and editorials but clothes cars ads and even Web sight designs and then how to use what they learn to write effective arguments

Region Focus ,2005 **Neuroteach** Glenn Whitman,Ian Kelleher,2016-06-20 Teachers are brain changers Thus it would seem obvious that an understanding of the brain the organ of learning would be critical to a teacher s readiness to work with students Unfortunately in traditional public public charter private parochial and home schools across the country most teachers lack an understanding of how the brain receives filters consolidates and applies learning for both the short and long term Neuroteach was therefore written to help solve the problem teachers and school leaders have in knowing how to bring the growing body of educational neuroscience research into the design of their schools classrooms and work with each individual student It is our hope that Neuroteach will help ensure that one day every student regardless of zip code or school type will learn and develop with the guidance of a teacher who knows the research behind how his or her brain works and learns

Common Sense: A Book for Conservatives & Liberals & Moderates to Unite for an Even Better America an Oregonian physician,2014-07-09 There s an international rating of countries by how corrupt they are called the Corruptions Perceptions Index from least corrupt at 1 to most corrupt at 175 The USA is 19 from least corrupt tied with Uruguay Not bad maybe but we can do better The reason we re not higher is how much special interests control our government This book suggests some reforms to discuss and consider to end corruption such as proportional representation public campaign financing term limits ranked choice and none of the above voting and combining these with a long term federal balanced budget and just and fair and simple taxation Many of these require Constitutional Amendments But Congress proposes Amendments and the incumbents in Congress are unlikely to propose these reforms because they would change how the people in Congress become incumbents in the first place However our Founding Framers gave us a solution for just this problem the states calling an Article V Convention to Propose Amendments *Biopolitics After Neuroscience*

Jeffrey P. Bishop,M. Therese Lysaught,Andrew A. Michel,2022-05-19 This book offers a provocative analysis of the neuroscience of morality Written by three leading scholars of science medicine and bioethics it critiques contemporary neuroscientific claims about individual morality and notions of good and evil Winner of a 2021 prize from the Expanded Reason Institute it connects moral philosophy to neoliberal economics and successfully challenges the idea that we can locate morality in the brain Instead of discovering the source of morality in the brain as they claim to do the popularizers of contemporary neuroscience are shown to participate in an understanding of human behavior that serves the vested interests of contemporary political economy Providing evidence that the history of claims about morality and brain function reach back 400 years the authors locate its genesis in the beginnings of modern philosophy science and economics They further map this trajectory through the economic and moral theories of Francis Bacon David Hume Jeremy Bentham John Stuart Mill and the Chicago School of Economics to uncover a pervasive colonial anthropology at play in the neuroscience of morality today The

book concludes with a call for a humbler and more constrained neuroscience informed by a more robust human anthropology that embraces the nobility beauty frailties and flaws in being human *Think Like a Freak* Steven D. Levitt, Stephen J. Dubner, 2014-05-12 The New York Times bestselling *Freakonomics* changed the way we see the world exposing the hidden side of just about everything Then came *SuperFreakonomics* a documentary film an award winning podcast and more Now with *Think Like a Freak* Steven D Levitt and Stephen J Dubner have written their most revolutionary book yet With their trademark blend of captivating storytelling and unconventional analysis they take us inside their thought process and teach us all to think a bit more productively more creatively more rationally to think that is like a Freak Levitt and Dubner offer a blueprint for an entirely new way to solve problems whether your interest lies in minor lifehacks or major global reforms As always no topic is off limits They range from business to philanthropy to sports to politics all with the goal of retraining your brain Along the way you ll learn the secrets of a Japanese hot dog eating champion the reason an Australian doctor swallowed a batch of dangerous bacteria and why Nigerian e mail scammers make a point of saying they re from Nigeria Some of the steps toward thinking like a Freak First put away your moral compass because it s hard to see a problem clearly if you ve already decided what to do about it Learn to say I don t know for until you can admit what you don t yet know it s virtually impossible to learn what you need to Think like a child because you ll come up with better ideas and ask better questions Take a master class in incentives because for better or worse incentives rule our world Learn to persuade people who don t want to be persuaded because being right is rarely enough to carry the day Learn to appreciate the upside of quitting because you can t solve tomorrow s problem if you aren t willing to abandon today s dud Levitt and Dubner plainly see the world like no one else Now you can too Never before have such iconoclastic thinkers been so revealing and so much fun to read 50 Economics Classics Tom Butler-Bowdon, 2022-11-08 Economics drives the modern world and shapes our lives but few of us feel we have time to engage with the breadth of ideas in the subject 50 Economics Classics is the smart person s guide to two centuries of discussion of finance capitalism and the global economy From Adam Smith s *Wealth of Nations* to Thomas Piketty s bestseller *Capital in the Twenty First Century* here are the great reads seminal ideas and famous texts clarified and illuminated for all The revised edition will include 56 new titles addressing some more up to date areas of the subject such as *The Bitcoin Standard* *The Age of Surveillance Capitalism* and *Discrimination and Disparities* have a revised introduction to reflect on the current turbulence and challenges facing the global economy over the next decade have some of the less relevant titles removed Something of a modern classic in its own right E T magazine 50 Economics Classics is a celebration of the large imaginative canvasses of the great economists Butler Bowdon s choices are broad interdisciplinary and compellingly idiosyncratic His chapters are not simply straight summaries of the chosen works but thoughtful reflections on why we should care about this or that book and what its relevance is for us today Butler Bowdon s renderings are done so well that one might never bother going back to the original Professional economists students and

Colander, 2016-09-13 Social Science An Introduction to the Study of Society 16e approaches social science from a common sense perspective rather than from a conventional social science angle Readers will see how seemingly diverse disciplines intermingle anthropology and economics for example The goal of the book is to teach students critical thought and problem solving skills that will allow them to approach social issues in an unbiased manner New to this edition are significant updates on Race and the police More comparison contrasts of deviance and criminality Alternative pathways in criminal justice new technology such as self driving cars Gay marriage American political dynasties Refugee and immigration issues in Europe globally American political dynasties China's growing power New trade initiatives States in the Middle East Nuclear arms control Expanded web based ancillaries for students and teachers

Killed by a Traffic Engineer Wes Marshall, 2024-06-04 In the US we are nearing four million road deaths since we began counting them in 1899 The numbers are getting worse in recent years yet we continue to accept these deaths as part of doing business There has been no examination of why we engineer roads that are literally killing us Fixing the carnage on our roadways requires a change in mindset and a dramatic transformation of transportation This goes for traffic engineers in particular because they are still the ones in charge of our streets In Killed by a Traffic Engineer civil engineering professor Wes Marshall shines a spotlight on how little science there is behind the way that our streets are engineered which leaves safety as an afterthought While traffic engineers are not trying to cause deliberate harm to anyone he explains they are guilty of creating a transportation system whose designs remain largely based on plausible but unproven conjecture Thoroughly researched and compellingly written Killed by a Traffic Engineer shows how traffic engineering research is outdated and unexamined at its best and often steered by an industry and culture considering only how to get from point A to B the fastest way possible to the detriment of safety quality of life equality and planetary health Marshall examines our need for speed and how traffic engineers disconnected it from safety the focus on capacity and how it influences design blaming human error relying on faulty data how liability drives reporting measuring road safety outcomes and the education and reeducation of traffic engineers Killed by a Traffic Engineer is ultimately hopeful about what is possible once we shift our thinking and demand streets engineered for the safety of people both outside and inside of cars It will make you look at your city and streets and traffic engineers in a new light and inspire you to take action
