University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

The Times Good University Guide 2007 John O'Leary, Andrew Hindmarsh, Bernard Kingston, 2006 Since 1992 The Times has produced the most widely respected and used university league tables The Guide takes the key measures of quality as its focus so you can make informed choices of university and subjects The rankings provide hard data analysed interpreted and presented by a team of experts The 2007 edition has been further extended now offering unique league table

presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia
