Position: The Insider's Guide to Air Travel Mark Gerchick, 2013-06-10 Sit back relax and enjoy the flight our pilots still
intone But who are they kidding Former FAA chief counsel and senior aviation policy official Mark Gerchick unravels the
unseen forces and little known facts that have reshaped our air travel experience since September 11 2001 With wry humor
and unique insight Gerchick takes us past the jargon technicalities and all is well platitudes to expose the new normal of air
travel from the packed planes and myriad hassles of everyday flying to the alchemy of air fares the airlines' endless nickel and
diming and the elusive hope of escape from steerage We find out what pilots do in the cockpit what's really worth worrying
about when it comes to airline safety and why we get sick on planes Meanwhile Gerchick ponders the jarring disconnect
between our quaint expectations of service with a smile and the grim reality of cramped seats no free lunch and watch yer
knees With sympathy for both fliers and airlines Gerchick shows how the new business all business airline industry has finally
learned to make money even in the face of crushing fuel costs and get millions of travelers where they're going every day
safely and quickly From his singular vantage point as former aviation regulator and policymaker Gerchick gives us a
straightforward insider's view of how hard it is for government to improve the traveler's lot by explaining the vagaries of
consumer protection rules as well as the political realities and the economic forces at work While Gerchick offers reasons to
hope for a better future in air travel he presents an unvarnished look at what we can expect good and bad when we take to
the skies Some of it will reassure you some will make you cringe but all will open your eyes to what it means to fly today

winemakers and recipes to pair with their wines **Empire of the Fund** William A. Birdthistle, 2016-06-01 Empire of the Fund is an exposé and examination of the way we save now. With the rise of the 401 k and demise of the pension, the United States has embarked upon the richest and riskiest experiment in our financial history. Over the next twenty years, nearly eighty million baby boomers will retire at a pace of ten thousand per day. The hypothesis of our experiment is that millions of ordinary untrained busy citizens can successfully manage trillions of dollars in a financial system dominated by wealthy skilled and powerful financial institutions, many of which have a record of treating individual investors shabbily. The key tools in our 401 k plans and individual retirement accounts are mutual funds, which have ballooned to hold more than 16 trillion. But these funds pose dangers to our savings in three ways: through structural vulnerabilities that give money managers the incentive to focus on marketing over investing; through the very human challenges of managing our savings decades into the future; and through the peril of financial professionals behaving badly to our economic harm. Though Americans often hear of the importance of low fees in fund investing, few are aware of the astonishing panoply of ways that some financial advisers have illegally diverted money out of mutual funds: from abetting hedge funds to trade after the legal deadline; to inflating the assets on which they are paid a percentage; to paying kickbacks for brokers to sell their funds. This book will forewarn and forearm Americans by illustrating the structural flaws, perverse incentives, and litany of scandals that have bedeviled mutual funds. And by setting forth a pair of policy solutions to improve Americans' financial literacy and bargaining power, it will also attempt to safeguard our individual financial destinies and our nation's fiscal strength.
