Activated Sludge Separation Problems Valter Tandoi, Simona Rossetti, Jiri Wanner, 2017-09-15 Activated Sludge Separation Problems Theory Control Measures Practical Experiences Second Edition describes the most common activated sludge separation problems and explains the main reasons for the growth of the different filamentous microorganisms in activated sludge The book summarizes the identification techniques for important groups of activated sludge microorganisms both based on conventional microscopic analysis and using the biological molecular tools available today FISH and PCR This new edition with 70% new and updated material also provides explanation of basic activated sludge process principles and of parameters necessary for process control and operation The theory of secondary clarifiers is described to the extent necessary for understanding the construction and operation of secondary clarifiers The activated sludge reactor and secondary clarifiers are treated as one system and the interactions are explained The wide range of experiences around the world is documented and the methods to avoid the proliferation of these organisms are presented and critically reviewed Activated Sludge Separation Problems consists of six chapters presenting up to date technical and scientific aspects of these processes The new edition also features an extended list of literature references for further reading The book will be a valuable help for students of environmental engineering wastewater specialists plant operators and designers of activated sludge plants It is also useful for specialists in wastewater operation laboratories especially for those studying activated sludge separation properties

Guidelines for the Identification of Ciliates in Wastewater Treatment Plants Susana Serrano, Lucia Arregui, Blanca Perez-Uz, Pilar Calvo, Almudena Guinea, 2008-02-01 Ciliated protozoa are one of the most relevant biological communities in the reactors of wastewater treatment plants These organisms are excellent tools to assess the biological status of the reactor being used to monitor wastewater treatment plants performance This book has been designed to simplify identification of ciliates bearing in mind the difficulties on the manipulation and proper identification of these species The specific role of ciliates in WWTP is discussed methods for observation together with a glossary of scientific words and a simple and easy key to the taxonomic groups of ciliates are also provided Illustrations drawings photographs and brief morphological descriptions of the species are included Guidelines for the Identification of Ciliates in Wastewater Treatment Plants is the first book to use the new official classification proposed by the Society of Protozoologists 2005 It includes a complete chapter on methodology that is designed to be easy to follow and reproduce A simple key to classify main taxonomic groups and genera is included as are detailed descriptions to aid observation and identification of species of ciliates in addition to drawings and photographs that accurately reproduce ciliate species

Handbook of Biological Wastewater Treatment Adrianus van Haandel, Jeroen van der Lubbe, 2012-02-20 The scope of this comprehensive new edition of Handbook of Biological Wastewater Treatment ranges from the design of the activated sludge system final settlers auxiliary units sludge thickeners and digesters to pre treatment units such as primary settlers and UASB reactors The core of

the book deals with the optimized design of biological and chemical nutrient removal The book presents the state of the art theory concerning the various aspects of the activated sludge system and develops procedures for optimized cost based design and operation It offers a truly integrated cost based design method that can be easily implemented in spreadsheets and adapted to the particular needs of the user Handbook of Biological Wastewater Treatment Second Edition incorporates valuable new material that improves the instructive qualities of the first edition The book has a new structure that makes the material more readily understandable and the numerous additional examples clarify the text On the website www.wastewaterhandbook.com three free excel design spreadsheets for different configurations secondary treatment with and without primary settling and nitrogen removal can be downloaded to get the reader started with their own design projects New sections have been added throughout to explain the difference between true and apparent yield while the section on the F M ratio and especially the reasons not to use it has been expanded to demonstrate the effect of the oxygen recycle to the anoxic zones on both the denitrification capacity and the concept of available nitrate is explained in more detail the latest developments on the causes and solution to sludge bulking and scum formation to show the rapid developments of innovative nitrogen removal and sludge separation problems the anaerobic pre treatment section is completely rewritten based on the experiences obtained from an extensive review of large full scale UASB based sewage treatment plants a new section on industrial anaerobic wastewater treatment three new appendices have been added These deal with the calibration of the denitrification model empirical design guidelines for final settler design STORA STOWA and ATV and with the potential for development of denitrification in the final settler A new chapter on moving bed biofilm reactors Handbook of Biological Wastewater Treatment Second Edition is written for post graduate students and engineers in consulting firms and environmental protection agencies It is an invaluable resource for everybody working in the field of wastewater treatment Lecturer support material is available when adopted for university courses This includes course material for the first 7 modules in the form of PDF printouts and an exercise file with questions and answers and a symbol list Authors Prof dr ir A C van Haandel Federal University of Campina Grande Brazil and Ir J G M van der Lubbe Biothane Systems International Veolia The Netherlands
