Put Your Heart in Your Mouth Natasha Campbell-McBride, MD, 2018-11-30. Put Your Heart in Your Mouth provides not only a well written, easy to understand expose but also a practical plan for preventing heart disease and regaining health, one that involves a return to traditional foods and an avoidance of environmental pollutants and common household chemicals. And her recipe section is fantastic. Put Your Heart in Your Mouth is must reading for anyone interested in diet and health. Sally Fallon, President of The Weston A Price Foundation, Author of Nourishing Traditions. If you stop any person on the street and ask them what causes heart disease, you know what their answer will be: butter and eggs, meat and fat. This infamous Diet Heart Hypothesis was proposed in 1953 and it took scientists all over the world a few decades to prove it wrong. The trouble is that while science was beginning to cast doubt upon its basic tenets, the Diet Heart Hypothesis was giving rise to a powerful and wealthy political and commercial machine with a vested interest in promoting it by means of anti fat and anti cholesterol propaganda presented relentlessly and with increasing intensity. In Put Your Heart in Your Mouth, Dr Campbell McBride tackles the subject of CHD (Coronary Heart Disease) caused by atherosclerosis, a disease of the arterial wall that leads to narrowing and obstruction of the arteries. She maintains that conventional medicine does not actually know the cause of atherosclerosis or how to cure it and explores in this book what it is, what causes it and how to prevent and reverse it. She dispels the myth of the Diet Heart Hypothesis and explains that cholesterol is not the enemy but an integral and important part of our cell membranes.
