Towards a Philosophy of Real Mathematics David Corfield,2003-04-24 In this ambitious study David Corfield attacks the widely held view that it is the nature of mathematical knowledge which has shaped the way in which mathematics is treated philosophically and claims that contingent factors have brought us to the present thematically limited discipline Illustrating his discussion with a wealth of examples he sets out a variety of approaches to new thinking about the philosophy of mathematics ranging from an exploration of whether computers producing mathematical proofs or conjectures are doing real mathematics to the use of analogy the prospects for a Bayesian confirmation theory the notion of a mathematical research programme and the ways in which new concepts are justified His inspiring book challenges both philosophers and mathematicians to develop the broadest and richest philosophical resources for work in their disciplines and points clearly to the ways in which this can be done

Stories, Dice, and Rocks That Think Byron Reese,2022-08-23 Byron Reese gets to the heart of what makes humans different from all others Midwest Book Review What makes the human

mind so unique And how did we get this way This fascinating tale explores the three leaps in our history that made us what we are and will change how you think about our future Look around Clearly we humans are radically different from the other creatures on this planet But why Where are the Bronze Age beavers The Iron Age iguanas In Stories Dice and Rocks That Think Byron Reese argues that we owe our special status to our ability to imagine the future and recall the past escaping the perpetual present that all other living creatures are trapped in Envisioning human history as the development of a societal superorganism he names Agora Reese shows us how this escape enabled us to share knowledge on an unprecedented scale and predict and eventually master the future Thoughtful witty and compulsively readable Reese unravels our history as an intelligent species in three acts Act I Ancient humans undergo the awakening developing the cognitive ability to mentally time travel using language Act II In 17th century France the mathematical framework known as probability theory is born a science for seeing into the future that we used to build the modern world Act III Beginning with the invention of the computer chip humanity creates machines to gaze into the future with even more precision overcoming the limits of our brains A fresh new look at the history and destiny of humanity readers will come away from Stories Dice and Rocks that Think with a new understanding of what they are not just another animal but a creature with a mastery of time itself
