International Brand Management of Chinese Companies

Sandra Bell, 2008-03-29 China is certainly doing its best to keep the world mesmerized by its economic achievements. The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those economic miracles which have brought Germany Japan and the South East Asian Tigers into the top league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fledgling reintegration of China into the global economic system. In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years the Chinese economy seems to have reached an important threshold line of economic development and global integration. In the first quarter century of reform and global opening Chinese enterprises have been largely confined to a passive role in the global division of labor. Foreign enterprises as the proprietors of greatly superior business models production technologies management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations. Lacking the necessary production technologies products as well as marketing knowledge to successfully dress OECD consumers Chinese enterprises have been hardly able to enter the global markets without such guidance. Now this constellation is changing.

China's Industrial Policies and the Global Business Revolution Ling Liu, 2005-07-05 As China has blended market reforms with comprehensive industrial policies most research has focused on the national government's strategies for economic growth. However one of the unique characteristics of industrial policy in China is that it involves government intervention at all levels from the political elite all the way down to village leaders. This book focuses on the domestic appliance industry and China's three major business groups in this area Haier Hisense and Aucma. The Haier Group in particular is one of the most successful and competitive enterprises in China and is very well placed to compete globally as the Chinese economy becomes more integrated with the world trading system. This volume shows how industrial policy is formulated at the national level and implemented at the local level and examines how local government frequently intervenes in local enterprises business strategy and management. Of practical importance this book provides academics business people and policy makers with valuable insights into the development process and a concrete understanding of the challenges faced in the global business revolution by one of the world's most dynamic economies.

The Laws of Globalization and Business Applications Pankaj Ghemawat, 2016-10-21 The Laws of Globalization and Business Applications employs a variety of empirical methodologies to establish two broad regularities that apply to international activity at the firm industry and country levels the law of semiglobalization and the law of distance and explores some of their implications for business. Part I presents evidence in support of the law of semiglobalization at the country and the business levels historically and up to the

present Part II performs an analogous function regarding the second law of globalization showing that the gravity models that international economists have used to analyze merchandise trade between countries also apply to other types of international interactions and at the industry and firm levels as well Part III applies these laws to various challenges and opportunities that distance along various dimensions presents to multinational firms A free online appendix provides additional data analysis and documentation to support research applications
