*Sustainable Energy And Environmental Technologies - Proceedings Of The Third Asia Pacific Conference* Xijun Hu, Po Lock Yue, 2000-11-28 With the rapid expansion of the Asia Pacific economy in the last decade and the recovery after the recent crisis severe demands will be placed on energy services and the environment Coping with the volatile oil prices that persist in the market introduces an additional factor into the energy supply and demand equation not just for countries in this region but also worldwide Inevitably there will be implications for environmental issues too The future will see a continuing challenge to balance growth with sustainability in the economic social and environmental sectors This conference a sequel to

the immensely successful APCSEET conferences held in Singapore and Australia is aimed at meeting that challenge by addressing the pertinent issues related to sustainable energy and environmental protection. It provides a forum for participants from academia, industry and government agencies to interact, report on research in progress and identify opportunities in the fields of sustainable energy and environmental technologies. The presentations include not only technical issues such as air pollution control, wastewater treatment, solid waste management, renewable energy and cleaner production but also education and policy issues.

#### **Advances in Intelligent Control Systems and Computer Science** Loan

Dumitrache, 2012-08-22 The conception of real time control networks taking into account as an integrating approach both the specific aspects of information and knowledge processing and the dynamic and energetic particularities of physical processes and of communication networks is representing one of the newest scientific and technological challenges. The new paradigm of Cyber Physical Systems (CPS) reflects this tendency and will certainly change the evolution of the technology with major social and economic impact. This book presents significant results in the field of process control and advanced information and knowledge processing with applications in the fields of robotics, biotechnology, environment, energy, transportation, et al. It introduces intelligent control concepts and strategies as well as real time implementation aspects for complex control approaches. One of the sections is dedicated to the complex problem of designing software systems for distributed information processing networks. Problems as complexity and specific instruments for modeling and control are also presented in a group of papers which identifies a large opening towards the new generation of CPS. The book is structured so as to ensure a good equilibrium between conceptual and applicative aspects.

#### **Concise Encyclopedia of Green Technology in China** Nancy Liu-Sullivan, Lawrence R. Sullivan, 2023-10-15

Following decades of ignoring the environment, China has become a global leader in air and water purification, solid waste management and wastewater treatment with dramatic growth especially in solar and wind power while major outstanding problems include continued reliance on coal and other fossil fuels especially in power plants and heavy industry. Concise Encyclopedia of Green Technology in China provides a basic understanding of green technology in the environmental and economic policies of the People's Republic of China (PRC). Green technology is defined as any technology used to mitigate or reverse the deleterious effects of human activity on the natural environment. Green technology involves the application of multiple environmental sciences including green chemistry, material sciences and hydrology along with utilization of renewable energy sources such as geothermal, solar, tidal and wave and wind power. Innovative technologies developed in China include mass production of electric vehicles (EVs), development of photovoltaics along with electronic devices for remote sensing and monitoring and utilization of enhanced computer power for the analysis of big data.
