Disability Romel W. Mackelprang, Richard O. Salsgiver, Ryan C. Parrey, Ryan Parrey, 2021-12-15 Disability Fourth Edition is an indispensable tool for human services students in understanding disability from an empowerment perspective. Authors Mackelprang, Salsgiver, and Parrey establish the historical and societal context in which those living with disabilities are marginalized while offering a social ecological model and its three biosocial, psychosocial, and social cultural dimensions that students and instructors can employ. Readers will also be introduced to universal diversity theory which draws from feminist, race, disability, and queer theories for an approach that is applicable across all diverse groups. Written from a North American perspective, the book also addresses disability laws, policies, and practices globally. [The Pursuit of Human Well-Being](#)

Richard J. Estes, M. Joseph Sirgy, 2017-01-09 This handbook informs the reader about how much progress we the human race have made in enhancing the quality of life on this planet. Many skeptics focus on how the quality of life has deteriorated over the course of human history, particularly given World War II and its aftermath. This handbook provides a positive perspective on the history of well-being. Quality of life as documented by scientists worldwide has significantly improved. Nevertheless, one sees more improvements in well-being in some regions of the world than in others. Why? This handbook documents the progress of well-being in the various world regions as well as the differences in those regions. The broad questions that the handbook addresses include: What does well-being mean? How do different philosophical and religious traditions interpret the concept of well-being within their own context? Has well-being remained the same over different historical epochs and for different regions and subregions of the world? In which areas of human development have we been most successful in advancing individual and collective well-being? In which sectors has the attainment of well-being proven most difficult? How does well-being differ within and between different populations/groups that for a variety of socially created reasons have been the most disadvantaged (e.g., children, the aged, women, the poor, racial/ethnic and sexual minorities)? James Mannion, Kate McAllister, 2020-10-30 For the last eight years, James and Kate have been working together to design, implement, and evaluate a whole-school, evidence-informed approach to teaching and learning known as Learning Skills. An eight-year study with the University of Cambridge revealed that Learning Skills led to significant gains in subject learning with rapid gains among students from disadvantaged backgrounds. In this practical guide for teachers and school leaders, James and Kate reveal a recipe for success rooted in three key concepts: metacognition, reflecting on learning, self-regulation, taking ownership over the learning process, and oracy, developing high-quality speaking and listening skills. This is a book about what happened when a small team of teachers seized an opportunity to provide their students with the knowledge, the skills, and the confidence to take control of their own learning. This journey began with a question: how and what would we teach if there was no one watching? On the other side of fear is the teacher you want to be and the children you'd like to teach.
