Urgencias en la atención prehospitalaria María Jaramillo, Luis Conrado, Federico Velásquez, 2015-11-01 La Atención Prehospitalaria APH es uno de los pilares fundamentales de los Sistemas de Emergencias Médicas Los orígenes y el desarrollo de los modelos clínicos de este tipo de atención en Norteamérica y Europa han sido una pieza clave que ha permitido la creación de diferentes modelos a nivel mundial basados en estas dos grandes tendencias Los modelos han evolucionado de diferentes maneras de acuerdo a la realidad de cada país y dentro de

esta diversa realidad claramente la mayor evolución la han logrado los países que desarrollaron paralelamente procesos educativos especializados en esta área. Estos procesos de educación superior en APH han sufrido un avance muy importante especialmente en las dos últimas décadas en Latinoamérica. Colombia ha sido uno de los países que más ha generado procesos de desarrollo en APH incluyendo procesos educativos y legislativos. Textos especializados como este donde se plasma la experiencia acumulada por un grupo de profesionales que han desarrollado gran parte de su desempeño laboral en el área de formación del personal de APH son un ejemplo de cómo se puede avanzar y permitir que información actualizada basada en evidencia científica e interpretada por personal experto llegue a estudiantes de las carreras de formación no solo en Colombia sino en toda América Latina. Estos procesos de educación superior en APH han sufrido un avance muy importante especialmente en las dos últimas décadas en Latinoamérica.
