Thomas, Mohammed Arif P., E. Bhoje Gowd, Nandakumar Kalarikkal, 2017-09-15 *Crystallization in Multiphase Polymer Systems* is the first book that explains in depth the crystallization behavior of multiphase polymer systems. Polymeric structures are more complex in nature than other material structures due to their significant structural disorder. Most of the polymers used today are semicrystalline and the subject of crystallization is still one of the major issues relating to the performance of semicrystalline polymers in the modern polymer industry. The study of the crystallization processes, crystalline morphologies, and other phase transitions is of great significance for the understanding of the structure-property relationships of these systems. Crystallization in block copolymers, miscible blends, immiscible blends, and polymer composites and nanocomposites is thoroughly discussed and represents the core coverage of this book. The book critically analyzes the kinetics of nucleation and growth process of the crystalline phases in multi-component polymer systems in different length scales from macro to nanoscale. Various experimental techniques used for the characterization of polymer crystallization process are discussed. Written by experts in the field of polymer crystallization, this book is a unique source and enables professionals and students to understand crystallization behavior in multiphase polymer systems such as block copolymers, polymer blends, composites, and nanocomposites. Covers crystallization of multiphase polymer systems including copolymers, blends, and nanocomposites. Features comprehensive detailed information about the basic research, practical applications, and new developments for these polymeric materials. Analyzes the kinetics of nucleation and growth process of the crystalline phases in multi-component polymer systems in different length scales from macro to nanoscale. **Popular Science** ,1980-07 Popular Science gives our readers the information and tools to improve their technology and their world.
