plant a Neem tree and then plant some other fruit trees like mangoes and lemons The Neem tree used to grow wild but it is now cultivated extensively throughout the land It is estimated that there are about 138 million Neem trees cultivated by farmers in Neem plantations throughout India We are not talking about the ones which grow completely wild in the forests and in the woods or in your gardens There has been a long mythological history of the Neem coming down the ages Let me give you one example The Neem grown on the outskirts of the village would be worshipped by ancient villagers who wanted the friendly spirits living on the Neem to grant them their wishes That is why they often fed the Neem with milk or buried copper coins underneath the Neem tree I do not know who took advantage of the buried coins but I saw this pattern being followed as an adult when people got to know about the only Neem tree in the locality which happened to have been planted by my grandfather four decades earlier

Introduction

I remember my father recounting a traditional and ancient Persian poem to me which he had learned when his grandmother was busy cooking in the kitchen. She was just following ancient traditions when women from the Mogul times 14th century sang this song for fun in the kitchen while cooking and amusing their kids at the same time. The translation from the vernacular goes something like this:

Clove and cardamom good pals they
Went for a forbidden swim for kicks
And soon we heard Clove yelling Golly cardamom has gone for a six
and so on in more hilarious verses about how clove would and could not bother to drag the drowning cardamom out of the water because he would get wet, catch a cold, his momma had told him not to go swimming and so on.

Until cardamom came out of the water and both went home. Home meaning the tummy of a gourmet who would appreciate the presence of cloves and cardamom in his delicately seasoned dish.

The Association of cloves and cardamoms have been a part of the lives of spices in the East. Where you put in a couple of ground cloves you may be asked whether you want to add some more cardamoms in too. Most often you say yes because after all that is going to increase the taste quotient. Cloves also go well with cinnamon, star anise, basil and pepper. Nevertheless, this book is going to tell you all about the magic of cloves which has been considered to be one of the most precious spices treasured down the centuries by the West. Wars were fought for cardamoms, cinnamon, pepper and cloves. Trade routes to the Indies and to the East were jealously guarded by adventurous traders in the West. Cloves first originated in Indonesia from where traders took them all over the world in ancient times. In fact 3000 years ago a Chinese emperor asked his courtiers to chew ding xiang in order to keep their breath fresh when they came into his presence. Apart from its use in medicine, it was and is also used extensively to add taste, sweetness and warmth to a dish. Archaeologists have found traces of cloves in archaeological excavations going back to 1721 BC in Syria. So this shows how long this great and precious spice has been associated with mankind.

herbalists who employ most species of herbs from mosses to trees in making their herbal remedies This book is going to give you an introduction to some of the herbs which are easy to grow and you can obtain easily fresh or dried How did people get to know about herbs in ancient times The awareness of the edible as well as the remedial qualities of herbs must have been gained by happy and sad experiences in prehistoric days When food was scarce and often very nasty pungent herbs made it more palatable The larger succulent leaves and plants provided salads and vegetables as an accompaniment to hunted mastodons and other prehistoric beasts Soon man found out that some of these herbs could cure and heal wounds and ease suffering as even the tastiest culinary herb has a real medicinal value and virtue This is how prehistoric man found out that Moss sphagnum was an excellent healer of wounds Just imagine he went hunting and got into an argument with a sabertooth And there he was with wounds all over his body lying nose down on the mossy ground So he found himself clutching a handful of moss squeezing it and trying to stop the blood flow from the wounds Hey the Moss was so absorbent that it stopped the wound from bleeding any more So back he came back to his tribal camp with Moss sticking all over his body After a week or so he noticed that his wounds were healing really well Now most of this was just by trial and error and luck His genetic makeup was strong and his diet conducive to good natural healing But that meant that the next time he went on the warpath with other tribes in the vicinity he made sure that the healer had packed lots of sphagnum along with food in a pouch for every warrior Early civilizations inherited this knowledge and developed it even further and both doctors and cooks used herbs appreciatively and with increasing beneficial effects Doctors experimented with every kind of plant and cooks with the more deliciously flavored types
