Beyond Digital Representation Andrea Giordano, Michele Russo, Roberta Spallone, 2023-09-01 This book collects contributions which showcase the impact of new augmented reality AR and artificial intelligence AI technologies considered jointly in the fields of cultural heritage and innovative design AR is an alternative path of analysis and communication if applied to several fields of research in particular if related to space and artifacts in it This happens because the neural network development strengthens the relationship between augmented reality and artificial intelligence creating processes close to human thought in shorter times In the last years the AR AI expansion and the future scenarios have raised a deep trans disciplinary speculation The disciplines of representation drawing surveying visual communication as a convergence place of multidisciplinary theoretical and applicative studies related to architecture city environment tangible and intangible cultural heritage are called to contribute to the international debate The book chapters deal with augmented reality and artificial intelligence analyzing their connections as research tools for knowing the environment In particular the topics focus on the intersection between real and virtual world and on the heuristic role of drawing in the enhancement and management of cultural heritage in planning and monitoring the architecture the environment or the infrastructures Scientists involved in AR and AI research applied separately or together in the field of cultural heritage architectural design urban planning and infrastructures analysis as well as members of public and private organizations make up interdisciplinary groups that fuel the discussion focusing on the priorities and aims of the research related to the disciplines of representation Transactions of the Thoroton Society of Nottinghamshire Thoroton Society, 2008 List of members in each volume Italian survey & international experience AA. atto e sulla loro evoluzione Gli atti relativi sono quanto di più significativo possa esistere per una lettura in tal senso Da sempre cerco di acquisire quelli dei convegni della nostra area anche di quelli ai quali non ho partecipato li esamino evidenziando ciò che allo stato mi pare più interessante li conservo con cura consultandoli immancabilmente quando debbo delineare lo stato dell'arte su qualche argomento che mi appresto ad affrontare Gli atti di questo Convegno di Parma il 36 dei docenti delle Discipline della Rappresentazione nelle Facoltà di Architettura e di ingegneria non si sottraggono a queste caratteristiche anzi le confermano in pieno In primo luogo attestano a dispetto di quanto gli uccelli di malaugurio presenti anche al nostro interno affermano la consistente ripresa dell'attività di ricerca nell'area della rappresentazione grafica Sono pervenuti ben 119 contributi un numero di tutto rispetto se si pensa che siamo di fronte a convegni annuali mentre altri appuntamenti omologhi come i congressi di EGA o la International Conference on Geometry and Graphic per citare incontri periodici ai quali partecipano alcuni di noi si svolgono invece con cadenza biennale E se si considera che ben 54 contributi di colleghi italiani sono stati inviati nello stesso tempo a revisione per il Congresso internazionale EGrafiA 2014 che si terrà a Rosario Argentina solo due settimane dopo l'incontro di Parma Si conferma quindi dopo i 117 interventi inviati al precedente convegno UiD di Matera anche la forte ripresa di interesse per il nostro più importante appuntamento annuale A tal fine di sicuro ha giovato la decisione di renderlo finalmente itinerante come si verifica per tutti quelli omologhi ovunque nel mondo con conseguente stimolo di dinamico protagonismo positivo delle sedi interessate emulazione e tendenza ad adottare i protocolli più condivisi e le migliori pratiche organizzative così come messo in atto dal gruppo di Parma coordinato da Paolo Giandebiaggi al quale va il più vivo ringraziamento dell'Unione e mio personale Positivi pertanto sono stati l'anticipazione dei tempi di definizione delle tematiche e della call l'adozione della responsabilità scientifica in capo allo stesso Comitato Tecnico Scientifico della UiD e di procedure partecipate di valutazione e selezione degli interventi con la revisione mediante rigoroso processo di double blind peer review con l'invio a un terzo revisore nei casi controversi che ha coinvolto più di trenta colleghi italiani e stranieri l'adeguata stampa degli atti Ancora irrilevante in termini numerici la presenza di colleghi stranieri a testimoniare da un lato la pochezza di relazioni internazionali di carattere istituzionale della UiD e dall'altro il fatto che nell'ambito delle comunità scientifiche riconducibili alla rappresentazione grafica il Rilievo tema del Convegno praticato con specifiche valenze didattiche e scientifiche quasi esclusivamente dagli italiani dagli spagnoli di Expresso e Gráfica Arquitectónica e quello a vista dagli argentini Di contro come a Matera dove gran parte degli interventi era comunque riconducibile a rilievi proprio il tema scelto ha di sicuro aiutato la numerosa partecipazione a conferma che ormai gran parte dell'attività di ricerca del settore si sviluppa in Italia nel campo del Rilievo questo un dato inequivocabile connesso a molti fattori di varia natura a volte contrastanti e spesso correlati sul quale dobbiamo riflettere a fondo continuando il dibattito avviato nel 2012 al Convegno di Roma Elogio della teoria Identità delle discipline del disegno e del rilievo Fino a che punto ad esempio ci è dovuto al fatto che mentre nel campo della rappresentazioni infografica in effetti non si sono più registrati a partire dall'ultimo

decennio del secolo scorso sviluppi rivoluzionari il Rilievo invece ha continuato ad avere negli ultimi anni trasformazioni innovazioni significative Di sicuro il campo che ci offre la maggiore visibilit  e le maggiori possibilit  operative in ambito accademico nelle relazioni scientifiche con altre aree culturali nel trasferimento tecnologico e quello nel quale si svolge la quasi totalit  delle nostre attivit  di finanziamento mediante convenzioni conto terzi quello nel quale pi  possiamo mettere in mostra oltre al sapere la nostra capacit  di sapere fare tanto per usare uno slogan che negli ultimi due decenni ha caratterizzato non sempre positivamente tutta l'universit  italiana Certo proprio questo Convegno conferma pure con gli interventi pervenuti per la terza sessione che nel migliore dei casi continua a trattarsi di ricerca applicata Ne deriva che occorre porsi il problema della possibilit  pi  che dei margini di affrontare anche in questo campo questioni ascrivibili alla ricerca teorica di base magari con apporti interdisciplinari e strette relazioni con altri settori informatica in primo luogo A ben vedere per si tratta di un'attivit  che non solo coinvolge in maniera quasi esclusiva le generazioni pi  giovani della nostra area ma ha avuto sta avendo conseguenze immense impensabili prima come sempre succede e forse ormai gi  irreversibili per la nostra identit  culturale e scientifica Non sono cambiati infatti solo e semplicemente gli strumenti e le tecniche di rilevamento e restituzione che hanno stravolto il modo di operare e il linguaggio rendendo in breve obsolete procedure che sembravano innovative e introducendo termini nuovi che hanno stravolto il lessico specifico ancora alla ricerca di una propria stabilit  E che come bene illustrato da Carlo Bianchini delineano un vero e proprio salto evoluzionistico un cambiamento cos  radicale che credo possa portare a definire un Rilievo 2.0 Sta cambiando l'oggetto stesso del nostro operare che dal rilievo dell'architettura e degli ambiti urbani si esteso in maniera e in misura sempre pi  consistenti e ragguardevoli al rilievo di dipinti parietali e non anche di tombe di sculture antiche e contemporanee e di oggetti non pi  solo archeologici ma anche di design perfino dei disegni di moda In una parola si potrebbe dire che si esteso al rilievo dei beni culturali in senso ampio e non solo Si a un passo e qualcuno di noi gi  l'ha fatto dal dedicarsi anche al rilievo di qualsiasi oggetto anche di quelli di interesse in campo medico dalle parti del corpo umano alle loro eventuali protesi cos  come gi  compiuto nell'ultimo decennio dai colleghi di altre aree della rappresentazione ingegneristica Se qualcuno pu  restare interdetto solo il caso di ricordare che proprio attraverso gli studi sul corpo e sulle proporzioni umane Albrecht D rer colse la necessit  di rappresentare gli oggetti mediante la doppia proiezione ortogonale anticipando di circa tre secoli l'impostazione di Gaspard Monge Al punto che agli inizi del Novecento Federico Amodeo lo ritenne il vero padre fondatore della Geometria descrittiva e giunse addirittura a proporre di chiamare il metodo delle proiezioni ortogonali metodo di D rer Monge A chi interessato pi  al futuro che al passato va invece fatto rilevare che proprio questi lavori questi oggetti di investigazione non solo testimoniano un profondo allargamento della sfera del nostro sapere ma stanno lentamente ma inesorabilmente riconfigurando il nostro specifico quasi come in una mutazione genetica Da esperti di disegno dell'architettura nelle sue varie e ampie declinazioni dei suoi fondamenti scientifici e delle sue applicazioni stiamo passando a essere soprattutto gli esperti dell'elaborazione e dell'

utilizzo di immagini visive. Ad aggregare con noi anche quella che un quarto di secolo fa Gary Bertoline definì come una nascente area scientifica, quella della visual science, le cui basi collocava in tre aree: spatial cognition, imaging and geometry, e per le cui applicazioni individuava due settori: artistico e tecnico. Piuttosto nel merito delle singole relazioni, va detto che per certi versi risulta un po' forzata la classificazione sulla base delle indicazioni degli stessi autori. Nelle tre sessioni in particolare alcuni interventi della sezione La ricerca avanzata potrebbero stare meglio in una delle altre due. Gran parte delle comunicazioni sono frutto di progetti di ricerca e campagne specifiche anche in ambito internazionale, soprattutto in Europa dell'Est e in America latina, spesso finanziati a valle di bandi con procedure competitive. Vi sono interventi di carattere generale sulla funzione e il ruolo del rilievo anche in ambito didattico e con qualche interessante confronto tra le esperienze di vari paesi. Riflessioni sui diversi tipi di rilievo in particolare tra quello architettonico, quello archeologico che sta interessando sempre più la nostra area e quello per il design che già tutto dentro la visual science, sulle finalità per la documentazione per il restauro dell'opera, in numerose comunicazioni vi è un adeguato approccio critico non semplicemente operativo all'utilizzazione delle nuove procedure di presa dei dati, elaborazione e restituzione degli stessi. In particolare sulla modellazione parametrica, sull'estensione al rilievo di logiche BIM, HBIM, Historic BIM e di interoperabilità sull'introduzione di realtà aumentata, l'uso di software open source. Talvolta chiaro il tentativo di contribuire a ottimizzare le operazioni fino a definire una compiuta metodologia specifica, tuttora in molti casi in via di definizione. Sorprende che si continui a non soffermarsi come sarebbe auspicabile sulle eventuali conseguenze della perdita del contatto immediato e diretto con la misura, connessa all'impiego delle apparecchiature tecnologicamente più avanzate, atteso che l'architettura proprio come l'ingegneria è imprescindibile dalla misura. Diminuiscono in misura drastica, fin quasi ad annullarsi, i rilievi in Italia di centri storici, di edifici monumentali, di architetture vernacolari, di testimonianze di archeologia industriale e di fortificazioni, sui quali in passato si lavorò tanto. Aumentano invece quelli su tali temi all'estero e anche in Italia quelli su tematiche e tipologie costruttive poco coltivate in passato: siti UNESCO, cimiteri, costruzioni rupestri, segmenti specifici di particolari stagioni dell'architettura: tardo gotico, sardo, chiese gotiche, napoletane, architettura religiosa italo-greca e soprattutto di pitture parietali. Si registra una sorta di stasi sui rilievi delle realtà territoriali e urbane per i quali si hanno poche relazioni. Il gruppo di Carmine Gambardella, Andrea Rolando, ad esempio, a dispetto delle grandi possibilità che le nuove procedure consentono, facendo intravedere per la prima volta potenzialità per superare i limiti della rappresentazione tradizionale. Curiosamente l'analisi multicriteriale sulla quale tanto si lavorò alla SUN, la rappresentazione delle caratteristiche immateriali del territorio, tema avviato in Italia quindici anni fa alla Facoltà di ingegneria dell'Università di Salerno, le sperimentazioni e le pratiche dei gruppi di ricerca del Politecnico di Torino, in merito alla rappresentazione dell'ambiente e del territorio, restano ancora esperienze isolate che non hanno avuto ricadute significative nel nostro ambito. Di contro si profila un interessante allargamento per il rilievo architettonico tradizionale in particolare con l'esigenza oggi più

approcciabile di tenere presente non semplicemente lo spazio fisico geometrico ma anche quello che Rosario Marrocco definisce nel suo intervento lo spazio percepito in buona parte inteso e identificabile come lo spazio vissuto Uno spazio che tiene conto quindi della dimensione tempo e delle trasformazioni dello spazio fisico per effetto di fattori endogeni ed esogeni p e illuminazione corpi in movimento E che di fatto potrebbe essere inteso come lo spazio architettonico tout court considerato che ormai quasi un secolo che con l'acquisizione della consapevolezza della dimensione tempo e con l'impiego massiccio del vetro e dei suoi derivati o surrogati come materiale da costruzione si rotta l'identit  spazio volume spazio architettonico spazio geometrico e il primo diventato qualcosa di ben pi  complesso e articolato Come in ogni processo complesso si sono fatti molti passi avanti ma anche qualcuno indietro Scompaiono quasi del tutto per fortuna le comunicazioni elaborate sulla base di rilievi effettuati dagli studenti forse perch  questi non dispongono ancora delle attrezzature necessarie per le nuove tecnologie Altri elementi positivi sono l'ampia partecipazione di giovani non strutturati quasi la met  del totale e il fatto che moltissimi professori esperti abbiano sottoposto senza batter ciglio i loro interventi alle revisioni anonime Le comunicazioni si arricchiscono di opportuno taglio ampio e di aperture interdisciplinari di note non solo bibliografiche e di citazioni anche esterne al nostro ambiente Nel contempo pare che in alcune nostre frange sia attecchito il fenomeno dell'autocitazione in misura ormai dilagante fino ad assumere dimensioni preoccupanti al limite della degenerazione Ovviamente non vi nulla di male nell'autocitarsi in alcuni casi e ove indispensabile in un ambito di ampio respiro che in primo luogo tenga conto dei lavori fondamentali e di riferimento sull'argomento trattato ma citare solo o prevalentemente se stessi e il proprio intorno inqualificabile da qualsiasi punto di vista e squalifica chi persegue tale prassi

La documentazione dei teatri antichi del Mediterraneo. Le attività del progetto Athena a Mérida Carlo Bianchini, 2013-01-11T00:00:00+01:00 Facing English Text I Teatri Antichi rappresentano una delle eredità più straordinarie che le civiltà del passato ci hanno trasmesso. Straordinaria inoltre la capillare diffusione di questo tipo architettonico lungo l'intero bacino del Mediterraneo come pure il numero dei teatri che ancora oggi ospitano con regolarità rappresentazioni e spettacoli. In prospettiva la sopravvivenza dei Teatri Antichi di fatto oscilla tra questi due estremi: da un lato un riuso contemporaneo che ne mantiene vive le funzioni e la rilevanza culturale, sociale e anche economica; ma che nel medio lungo periodo conduce ad un inevitabile progressivo deterioramento; dall'altro una conservazione tout court che eliminando ogni pressione antropica preserverebbe effettivamente la struttura.

condannandola tuttavia ad una inesorabile morte sul piano culturale sociale ed economico Tutte le precedenti considerazioni sebbene con differenti livelli di priorit e differenti esigenze delineano con chiarezza la necessit che il problema venga affrontato nella sua interezza principalmente attraverso la progettazione la verifica e l applicazione in concreto di strumenti di gestione innovativi capaci di affrontare caso per caso le complesse problematiche fin qui schematicamente delineate dunque su queste basi che si mosso ATHENA Ancient Theatres Enhancement for New Actualities nell ambito di Euromed una misura dell Unione Europea nata allo scopo di favorire la cooperazione tra paesi dell area euro mediterranea Il Progetto ATHENA in particolare ha come obiettivo lo sviluppo sostenibile dei Teatri Antichi del Mediterraneo anche in relazione al loro rapporto con la societ civile e le istituzioni di tutela Sotto la supervisione del Regional Monitoring and Support Unit RMSU Il Progetto ha perseguito diversi obiettivi tutti finalizzati alla definizione di una nuova e pi aggiornata strategia di documentazione conservazione valorizzazione e fruizione compatibile delle strutture teatrali antiche del Mediterraneo a cominciare da quelle presenti nei paesi partner Giordania Italia Spagna Tunisia e Algeria e ricompresi nella lista UNESCO Nel presente volume sono dunque presentati I risultati delle attivit di documentazione e alcune analisi preliminari sviluppate sul sito spagnolo di Mrida in stretta cooperazione con l Instituto de Arqueologia de Mrida Leica Q User Guide Curtis G Fierro, 2021-06-27 The Leica Camera is arguably the best camera out there Powerful Takes great pictures and videos And does just about everything It is easy to use for some people absolutely But if you ve never used it before or if you have used it but want to get more out of it the truth is that this camera is a little intimidating because there are countless innovations and new features packed into this camera that it may seem overwhelming to use and enjoy However I have put this book together for but novice and expert Leica camera users All you need to become an expert and get the most out of your Leica Q Camera is right here This user guide will show you how to set up and maximally use all the essential features packed into your camera This guide also contains both simple and advanced directions tips and tricks that will help you in using some awesome features This guide is perfect for beginners and Leica experts and it is a practical approach to show you everything you need to know to get up and running and much more This book helps you discover your Camera full functionality and newest capabilities It is a practical guidebook with step by step ways to help you take full benefit of all the excellent features built in this Leica Q camera Scroll up and click on the BUY NOW WITH 1 CLICK to start **User Manual - LEICA R7**, 1992
