North American Social Report Alex C. Michalos, 2013-06-29 For readers who intend to read this volume without reading the first some introductory remarks are in order about the scope of the work and the strategy used in all five volumes to measure the quality of life In the first chapter of Volume I I reviewed the relevant recent literature on social indicators and social reporting and explained all the general difficulties involved in such work It would be redundant to repeat that discussion here but there are some fundamental points that are worth mentioning Readers who find this account too brief should consult the longer discussion The basic question that will be answered in this work in this Is there a difference in the quality of life in Canada and the United States of America and if so in which country is it better Alternatively one could put the question thus If one individual were randomly selected out of Canada and another out of the United States would there be important qualitative differences and if so which one would probably be better off To simplify matters I often use the terms Canadian and American as abbreviations for a randomly selected resident of Canada or the United States respectively

Fit to be Canadian? Lisa Tink,2022-06-09 In recent years recreation scholars and professionals began calling for a return to municipal recreation s historical roots as a public good Blaming neoliberal ideology for the current pay per use model these calls for a more inclusive recreation system have suggested the sector s business like practices should be of concern because

they are in direct opposition to the historic mandate of equal opportunity A central assumption underlying these calls for the recreation profession to return to its historical roots is that municipal recreation services until the late 1980s and early 1990s were available to all members of society This narrative is however a romanticized account of recreation s history In this book Lisa Tink challenges the often repeated narrative of a more inclusive and equitable era in recreation s past Tracing some of the conditions that have given rise to what she has termed the recreation industrial complex Tink s research demonstrates how recreation has by design served the interests of white heterosexual able bodied middle to upper class Canadians By exposing the ways particular bodies came to be centered in a recreation context the purpose of this important piece of recreation scholarship is to demonstrate how historical inclusions and exclusions whether intentional or not were in fact part of a broader biopolitical project intended to sustain white supremacy with the ultimate goal of encouraging critical dialogues about what is inherently problematic difficult and dangerous in the discourses practices and policies that govern our contemporary recreation systems
